Majlis to Debate **Impeachment** of **Iranian President**

TEHRAN — The Mailis decided Tuesday to debate the impeach-ment of President Abolhassan Bani-Sadr. The impeachment de-bate was expected to begin Wednesday and the final vote was expected in about a week.

Iranian state radio reported, meanwhile, that eight of the presi-dent's aides had been arrested. A bomb went off during the night at Mr. Bani-Sadr's house but damage was minor and no injuries were reported, a presidential spokesman said. The president was believed to be staying in his office, which was surrounded by Islamic Revolutionary Guards.

"The president has stated pub-licly that his life is in danger and his office is presently surrounded by armed men," a spokesman for Mr. Bani-Sadr said, without elabo-

As fundamentalist pressure for the overthrow of the 47-year-old president mounted, Mr. Bani-Sada's cultural adviser, Mor. Bami-Sada's cultural adviser, Mousavi Garmaroudi, resigned "by virtue of his Islamic duty," the Iranian news agency reported.

**R

The clerics and their front man, Premier Mohammed Ali Rajai, have steadily extended their hold on the government since winning control of the Majlis in the elec-tions a year ago. Mr. Bani-Sadr, the standard-bearer of the moderate, leftist and secular factions in the Iranian revolution, suffered a grave setback in the power struggle last week when Ayatollah Rubollah Khomeini, leader of the revolution, removed him as commander in chief of the armed forces.

The clerics then called for a Majlis debate on Mr. Bani-Sadr's competence.

The SI-year-old Ayatollah Khomeini offered a reprieve in a broadcast speech Monday, demanding that Mr. Bani-Sadr express "repentance" on radio and television for recent street clashes between his followers and the supporters of the Islamic Republican Party.

Instead Mr. Bani-Sadr proposed a televised debate between himself and his hard-line opponents. But the aystollah rejected the same proposal earlier this year, saying it would cause divisions harmful to the Iranian war effort against Iraq.

Single Supporter

there.' "One has to recognize," Mr. Reagan said in reference to the Is-raeli raid, "that Israel had reason

for concern in view of the past history of Iraq, which has never signed a cease-fire or recognized Israel as a nation, has never joined in any peace effort ... does not even recognize the existence of Is-rael as a country." But he added: "I think the big-

gest thing that comes out of what happened is the fact that this is further evidence that real peace, a settlement of all of the Mideast problems, is long overdue ... This is a compelling reason wby we should once and for all settle this

matter and bave a stable peace." He was asked whether he agreed with Arab leaders who said that because of the Israeli attack on the Iraqi reactor and the mild U.S. response to it, the peace effort of his Middle East troubleshooter, Philip C. Habib, appeared doomed.

U.S. Will Supply Peking With Weapons, Haig Says

By Don Oberdorfer and Michael Weisskopf Washington Post Service

PEKING - The United States has agreed for the first time to suparms to the People's Republic of China, Secretary of State Alex-ander M. Haig Jr., announced Tuesday night after three days of wide-ranging talks with Chinese leaders.

Mr. Haig said the decision had been made in Washington to remove China from the munitions control restrictions preventing any sale of lethal weapons to China, which was considered the United States' most implacable foe in the 1960s.

Chinese arms requests, once the restrictions are lifted, will be considered on "a case-by-case basis" after consultation with Congress and U.S. allies, Mr. Haig said. He indicated that potential Chinese

headed by Liu Huaqing, vice chief Haig left Washington for Peking, of the Chinese general staff. according to U.S. sources. The arms decision, taken in the context of what U.S. and Chinese Mr. Haig gave no indication Tuesday night whether the adminofficials described here as growing istration is considering govern-coordination and cooperation ment financing or other military against the Soviet Union, is likely aid in connection with Chinese

arms purchases. These currently are barred by U.S. law. Mr. Haig did say that the Reagan administration intends to ask Congress to amend U.S. laws "which lump the People's Republic of China with the Soviet Bloc."

Apparently because of Chinese sensibilities, Mr. Haig stopped well short of describing the Washington-Peking relationship as an alliance. After completing his talks, he said he informed Chinese ington's limit was the supply of dual use technology and "military support equipment" such as radar, trucks and transport aircraft. leaders that the United States inlends to treat China "as a friendly nation with which the United States is not allied but with which il shares many interests." Sorrow, Joy Mark Holocaust Reunion

By David K. Shipler New York Times Ser

JERUSALEM --- The stylishly dressed men and women would blend into a crowd on the streets of New York. But the blue numerals still are tatooed on their forearms, and now and then there is a man among them who may point to a scar where a Nazi pistol butt smashed his face. Survivors of the Holocaust, who opened their

gathering in Jerusalem Monday night, came together in a mingling of sorrow and joy, in hopeful search of friends and relatives long lost, in a mood to bear witness to themselves and the world. Five thousand assembled at Yad va-Shem, the

memorial and museum devoted to the Jewish victims of the Nazi camps, in Jerusalem. Each took a single rose to toss in solitary silence onto the great stone floor of the Hall of Remembrance, where the names of the death camps are engraved: Dachau, Auschwitz, Buchenwald, Bergen-Belsen Soon the names were obscured by flowers.

Here and there in the darkened hall, lone figures stood bent, staring into an ancient memory, covering a face with a hand, brushing moist eyes roughly with a sleeve and then taking a stride out into the sunlight, where groups of survivors clustered in bursts of conversation and tales of war and suffering. There was laughter, too, as friends found one another and survivors celebrated life."

As darkness fell, they heard Israel's president, Yitzhak Navon, admonish them: "It's your duty to tell and retell the vivid evidence of your horri-ble experiences to your children and grandchil-(Continued on Page 2, Col.1)

REMEMBERING — A survivor of Nazi concentration camps tossed a rose onto the floor of the Hall of Remembrance, Israel's Holocaust memorial, where the names of the German death camps are engraved.

November election.

In a statement opening his first press conference since the March 30 attempt on his life, the president demanded that Congress "live up to its original commitment and deliver to my desk before the August recess" both the spending and tax cut bills that make up the heart of the administration's economic program.

In the sternly worded statement, Mr. Reagan condemned Democratic-controlled House commit-Ices for trying to thwart the will of Congress, expressed in the budget resolution of last month, by making "unconscionable" budget cuts that could not he accepted.

He called on the House leadership to "revise the committee work so that it honestly and responsibly achieves the original spending goals" and warned that if this was not done, his administration would support a substitute hudget resolution on the House floor.

No 'Academic Exercise'

"The hard work of Congress in passing the bipartisan budget resolution was not an academic ex-ercise," he said. "It was a solemn commitment that transformed a mandate from the people into a compact with the people

Earlier Tuesday, the Senate Budget Committee voted unani-mously to send a bill containing \$39.6 billion in 1982 spending cuts to the full Senate next week with a recommendation for passage.

"I hope it isn't." Mr. Reagan responded. "I think be bas done a miraculous job so far, when you think that when we sent him 'bere, the Syrians and the Israelis, literally had the weapons c :ked, ready for war, and it's been several weeks now and no war has hap-

pened. "It would be just further tragic evidence if this latest happening should turn this off, but until he comes home and says 'I give up.' I am going to believe that we can do

'Offensive Weapons'

Noting Israel's threat to take military action to destroy Syrian ground-to-air missiles in Lebanon, reporter asked whether Mr. Reagan would consider such action a violation of the U.S. law restricting the use of U.S.-supplied weapons to defensive purposes only

Mr. Reagan said he could not answer that now, but he added that he would "hate to see this happen." He added that the Syrian missiles "are offensive weapons no question about which direction they are aimed." But be said Israeli action "would end our prospects of trying to bring peace to Leba-non, I know. We are going to try to use every effort we can on either side to see there isn't a firing of

Queen Rides in Open to Ascot Races

United Press Internati

ASCOT, England - Queen Elizabeth II rode in an open carriage on Ascot race course under heavy and unusally visible security in the monarch's first public appearance since a teen-ager fired a starter's pistol loaded with blanks at her Saturday.

For most of the ride, the queen - with Prince Philip at her side, and members of the royal family in other carriages — was about 20 yards from the cheering crowd of about 60,000 people lining racetrack rails. Policemen standing 10 yards apart along the rails had their backs to

the queen and faced the crowds, looking for any suspicious movements. Detectives also mingled among the racegoers.

The royal procession marked the start of Ascot week, the most stylish event in the British racing calendar. The queen brushed aside advice that she travel under cover. The queen feels that if she is going to a public engagement, the public must be able to see her," a member of the royal household said.

Spain Hints at Legal Action Against Press

MADRID --- The Spanish government responded to the latest police irregularity Tuesday by accusing the press of an "insidious campaign" against the paramilitary Civil Guard and hinting at legal action against newspapers.

The commotion was over Emilio Duran's expulsion from the Civil Guard after he fatally shot an unarmed man last weekend in a discoteque fracas ontside Madrid. The security office of the Interior Ministry said that Mr. Duran had been fully disciplined, but there have been public calls for his prosecution.

A note from security office said that a full investigation was under way to discover "those behind these campaigns" against the Civil Guard. It said the government reserved the right to apply legal action.

Spain Abortion Trial Resumes Amid Protest Renters

BILBAO, Spain — Feminists calling for liberalization of Spain's tough anti-abortion law demonstrated ontside the law courts here Tuesday as the trial of 11 women on abortion charges resumed after a 20-month

The judge suspended it again because three defendants did not appear. Lawyers defending the women, all from the poor Bilbao suburb of Basauri, said two had not been officially summoned while the third had left Spain. The judge issued a warrant for the arrest and provisional detention of the two women still in Bilbao.

Outside the court, police broke up a demonstration by several hundred persons, most of them women, who shouted for the defendants to be acquitted and an end to abortion trials.

For Publishing Norway's Military Secrets India Cautions U.S. on F-16 Sale to Pakistan New York Times Service

NEW DELHI - An Indian Foreign Ministry spokesman said Tuesday that the U.S. decision to sell F-16 fighter-bombers to Pakistan would affect the military balance in South Asia.

The spokesman also said that the U.S. decision "could undermine the serious effort that is under way to strengthen the process of normalizanon of relations between India and Pakistan."

The announced sale, part of a five-year, \$3-billion economic and military aid package, was announced Monday. The decision "could intro-duce immediately a new level of weapons sophistication into the region which would affect the existing balance," the Indian spokesman said.

Iran, Iraq Exchange Wounded War Prisoners The Associated Press

GENEVA - For the first time since fighting broke out last September," Iraq and Iran exchanged badly wounded prisoners of war on Tuesday, the Geneva-based International Committee of the Red Cross announced. The exchange, organized by the Red Cross, took place on Cyprus. Twenty-five wounded prisoners were returned to Iran, 17 to Iraq, the Red Cross said.

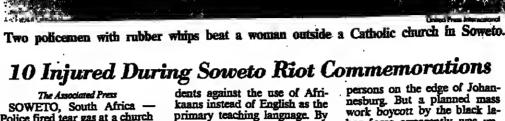

The Iranians had proposed the repatriation, the Red Cross said, adding, bowever, that there were no plans for further exchanges between the warring Golf neighbors.

Legislator Claims Drugs Found in Nimitz Dead

virtual encouragement for its adventuristic and expansionist policies from Washington."

Egypt, the one Arab nation with which Israel has a peace treaty, characterized the assault as an "irresponsible act" that "obstructs the road towards a just, peaceful settlement Sir Anthony Parsons, the British delegate, warned that Israel's raid

"has very serious implications for the international nuclear safeguards system." It "amounts to an attack on the IAEA safeguards regime.' The IAEA in Vienna has said it has inspected Iraq's nuclear facilities and found no weapons production. Israel is not inspected because it has not signed the nonproliferation treaty.

2 Arab Nations **Plan to Build** Nuclear Plants

Reader DAMASCUS — Syria is plan-ning to build a nuclear power plani to generate electricity and reduce the high cost of importing fuel, according to the country's minister for electric power.

The minister, Omar Yousef, made the announcement Monday at the opening session of the first Arab nuclear conference, which is taking place in Damascus a bit more than a week after Israeli jets destroyed an Iragi nuclear reactor outside Baghdad. Mr. Yousef said the Syrian nuclear plant would be

finished by 1991. The United Arab Emirates said it was also planning to use atomic power to generate electricity. The

electricity and water minister for the Emirates, Hamed bin Nasser al-Oweiss, said an expert from the International Atomic Energy Agency had arrived in Abu Dhabi four months ago to prepare a

study on the proposed nuclear installation. The power plant would probably be built by 1990, the

minister added. Ten Arab countries - not including Iraq - and the Palestine Liberation Organization are taking part in the conference. Also particpating are government and scientific organizations from several Western nations, Japan and India, along with representatives of the Arab League and the IAEA.

New White House Staff Criticized As Inadequate in Foreign Affairs

By Lou Cannon

and Lee Lescare

Washington Post Service WASHINGTON - Edwin Meese 3d a student of management technique who is fond of drawing organizational flow charts, designed the policy-making system for the Reagan White House and decided to break with tradition by having the national security adviser report to him in-stead of directly to the president.

Now, after four months in off-ice, some officials in the White House and other national security agencies think Mr. Meese made a major mistake. They are concluding reluctantly that the presiden-tial counselor is overextended and, as a result, the administration's ability to handle foreign policy questions suffers.

In the domestic arena, the trio of Mr. Meese, the White House counselor, James A. Baker 3d, chief of staff, and Michael K. Deaver, deputy chief of staff, communicates and coordinates smoothly. But the administration's start in foreign policy has been much rockier.

Secretary of State Alexander M. Haig Jr. and the senior White House staff have had their wellpublicized clashes, which appear to have subsided, reportedly at the insistence of the president.

Criticism of Allen

National security adviser Richard V. Allen, who runs the National Security Council staff, is criticized by some in the White House and at the State Department for failing to win the confidence of those at the top in the White House, except perhaps Mr. Meese, and for not developing the reliable analytical information the president should have.

The criticism of Mr. Meese is, voiced less often, because of Mr. Meese's influence and power and also because he is genuinely liked by most of those who deal with him. But many feel that Mr. Meese has stretched himself too thin, a weakness that shows up most clearly in complex foreign policy matters,

"What Mr. Meese needs is a Mr. Meese who can devote himself exclusively to foreign policy issues," said a highly placed official not in the White House,

Bush's Role

President Reagan and Mr. Meese publicly proclaimed that this administration would reduce the stature of the White House national security adviser in order to avoid the conflicting signals that emanated from past administrations. Some now worry that they succeeded beyond their wildest dreams.

s Listand in Mr. Compounding the problem, said three senior administration officials, is the NSC staff. "It's a weak staff. We have to get more quality people in," said one. In an attempt to fill the gap in the White House decision-making system, some sen-tor officials have turned to Vice President Bush. Mr. Bush has been prominent role. An ad hoc group, nameless so far, has formed around Mr. Bush and met in an effort to help coordinate foreign critics of the foreign policy pro-

"voluntary" Japanese pledge to re-duce exports of cars to the United but there is not a foreign policy framework comparable to wbat States. The pledge occurred, how-ever, only after the disagreements in the Cabinet were aired in a series of conflicting statements that led one senior White house adviser to say the handling of the auto imports question had been thoroughly fouled up.

Mr. Allen took himself out of the discussions over auto imports in order to avoid the appearance of conflict of interest. Before joining the administration Mr. Allen represented the Japanese auto company Nissan, maker of Dat-SHAS

Mr. Meese rejects suggestions that the National Security Council staff has been throttled back too far or that he and Mr. Allen have not succeeded in creating the right framework. Mr. Meese is pleased with the organization and says there is no need to alter it.

In public, Mr. Reagan, Mr. Haig, Mr. Allen and the trio of Mr. Meese, Mr. Baker and Mr. Deaver make no complaints about the foreign policy process. Mr. Reagan went out of his way

to proclaim the recent NATO ministerial meeting in Rome a "triumph." The visit bere of Japanese Premier Zenko Suzuki was considered a success although it led to strains inside the Suzuki government that brought about the resignation of the foreign minister.

"We do not have a coherent foreign policy," said a Reagan inti-mate who has studied the process. "We have some themes - the Russians are bad, the Brits are good -

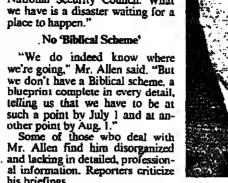

Reagan has done on the economic program ... Above all, we need a National Security Council. What we have is a disaster waiting for a place to happen." No 'Biblical Scheme' "We do indeed know where we're going," Mr. Allen said. "But we don't have a Biblical scheme, a blueprin1 complete in every detail. telling us that we have to be at

al information. Reporters criticize his briefings. As to Mr. Haig, after his conflict with the White House senior staff

over organization of foreign poli-cy, he has become less inclined to confrontation. Mr. Haig's natural instincts are to fight for tur, and his basic early problem with the White House was that the presi-dent does not like turf fights. Mr. Meese has what Mr. Haig

cks - an intimate understanding of the Reagan approach and an easygoing disposition. But Mr. Mrese also lacks what Mr. Haig has — a foreign policy background and friendships with the leaders of many allied nations.

One aid to communication be-tween the White House and the State Department has been the presence of William P. Clark, the deputy secretary of state who was Mr. Reagan's first chief of staff during his years as governor of

Edwin Meese 3d

California. Mr. Clark is the only person who is both the president's man and Mr. Haig's, and he also is a close friend of Mr. Meese, Mr. Deaver and Defense Secretary

Caspar W. Weinberger. Mr. Clark represents Mr. Haig at the Tuesday and Thursday national security briefings for the president and also substitutes for his boss whenever Mr. Haig is out of Washington. In addition, Mr. Clark is on the telephone to members of the trio several times a day. Mr. Deaver described Mr. Clark's role as "indispensable."

But the question remains whether the administration can manage foreign policy in a real crisis with a jerry built structure that some of its own leading players do not trust.

Joji Omura, director-general of the Defense Agency, said after a Cabinet meeting that he would have to reject any plans for military increases beyond Japan's current plan.

The latest U.S. suggestions, he added, amount to "much more" than the levels set in that plan.

Mr. Omura was referring to U.S. suggestions set forth last week at Hawaii, where military and diolo matic officials from both countries conferred about Japan's state of military preparedness.

The defense chief's comments seemed to herald a disappointing result in the higher level meetings later this month in Washington, where Mr. Omura is scheduled to meet Defense Secretary Caspar W. Weinberger. He said Tuesday that he will have to tell Mr. Weinberger that Japan will not go beyond current buildup plans.

His remarks also represented another step away from the generalized promises that Premier Zenko Suzuki had made during a visit to Washington last month, where be pledged Japan would make greater efforts in the military field.

The meetings in Hawaii and Washington had been planned to work out details of what once appeared to be a greater Japan military commitment in light of the Reagan administration's desire for an allied response to Soviet

military advances But since the Washington sum-mit meeting, Mr. Suzuki has backed off, claiming that be had not promised any new commitments with Mr. Reagan. He has also fixed a budget limit for next year that leaves little financial rection. room for higher military spending. Mr. Suzuki was placed on the defensive at bome after the Washington summit meeting. He was criticized for bowing to U.S. de-

mands, of secretly planning a full-fledged military alliance with the United States, and the dispute ended with the resignation of his foreign minister.

That episode was quickly fol-lowed by the bitter dispute over whether U.S. ships carry nuclear weapons into Japanese ports. A general anti-military climate em-erged that made it difficult for anyone in the government to seek an enlargement of Japan's forces. U.S. and Japanese officials refused Tuesday to spell out exactly what increases the American delegation sought in Hawaii last week. However, they are believed to have called for very significant

increases in air and sea forces in line with the U.S. view that Japan should take on a bigger military

try. Sir Charles Court, premier of West Australia, said the group was trying to generate propaganda and create divisions in Australia. Marcos Gains Re-Election in Landslide In 1969, Mr. Marcos was elected

President Marcos votes in his home town of Batac as his three children watch.

By Henry Kamm New York Times Service

MANILA - President Ferdinand E. Marcos, running virtually without opposition, was re-elected Tuesday by an overwhelming majority. The voting was the first for the presidency since 1969.

Incomplete returns late Tuesday night gave the president 88 percent of the vote total, far ahead of Alejo Santos of the Nacionalista Party, on whose ticket Mr. Marcos was first elected in 1965. Bartolome C. Cabangbang, who advocated admission of the Philippines as the 51st U.S. state, received 4 percent of the vote in incomplete returns.

for a second and constitutionally last, four-year term. However, in 1972, the president declared marual law and remained in office after his mandate expired in 1974. He lifted martial law last January. In a plebiscite in April, he gained approval for a six-year presidential term without limitation on the number of terms, and called Tues-

day's election. In addition to the president, Mr. Santos and Mr. Cabangbang, 10 candidates representing largely themselves also ran.

A coalition of the premartial-law leaders of the Nacionalista and Liberal parties campaigned for a

which produced the report, said rorism since 1968 when it began there were 6,714 international terkeeping computerized records on rorist incidents from 1968 through terrorism. The agency said that its previous data had been too de-1980, including 760 last year. By contrast, last year's report pendent on "U.S. sources" and

said there had been only 3,336 such incidents from 1968 through that it now is satisified that its records are "complete and current." 1979, with a peak of 413 in 1976. The 6,714 total includes 1,008 The report also listed several new categories, including "threats" and "hoaxes," which had never threats, 58 hoaxes and 121 cases of "conspiracy," another new catego-ry. The revision coincides with a **Old Numbers Replaced** w emphasis, within the administration and on Capitol Hill, on dangers of worldwide terrorism. The CIA study did not make special mention of that but did an-

Americans Targeted

According to the CIA, citizens of the United States, especially businessmen, remain a primary larget of terrorist attacks, particularly in the Middle East and Latin America. Six Americans in El Salvador, two in Turkey, one in the Philippines and one on the occu-pied West Bank were killed in international terrorist attacks last year, and 94 Americans were wounded, the report said.

The next "most victimized nationalities" were, in order, Israelis, Russians, Turks. Iraqis and Li-byans, the CIA said. This was a notable change from 1979 when the favorite targets were Amerirole in the Pacific Ocean.

cess say decisions careen from isiganda B sue to issue without the central focus that has been imposed on economic policy. es of Los

"What we need to do is to pull priorities together. We have to start asking the hard questions," said a senior official. For example: Is El Salvador still an issue? What should be done about U.S.-China relations, an important policy that has been on the back burner since Jan. 21?

Zigs and Zags

Soviet policy, despite assurances from White House policy-makers that a clear message has been sent to Moscow, appears to be a series of zigs and zags like the often-de-nounced Carter administration

The Reagan anti-Soviet rhetoric has been strong, but for domestic reasons the most dramatic and-Soviet action by Carter - the grain embargo in response to the Soviet invasion of Afghanistan — was lifted by Mr. Reagan. In addition, the administration has moved toward talks on limiting nuclear weapons based in Europe, talks that Moscow wants, and the Russians have been reinvolved in the Mideast diplomatic negotiations after their ally, Syria, moved anti-aircraft missiles into Lebanon.

Other early foreign policy deci-sions appear to have been produced by differing processes.

This politically astute administration looks most politically inept on its decision to sell a package of Air Force equipment, including radar reconnaissance planes known as AWACS, to Saudi Arabia. Senior White House aides say they will win the required congressional approval of the sale, but it is shaping up as what one called "a classic political battle."

In the Senate, Republican after Reagan's letter asking Mr. Smith Republican has gone on record to assess the legislation therefore with serious reservations about the sale. And the list includes Reagan supporters without large Jewisb constituencies.

Free Trade

Another decision, the attempt to balance Mr. Reagan's longstanding commitment to free trade with his campaign promise to help the U.S. auto industry, resulted in a

"Last year marked the first year that a large number of deadly terrorist attacks were carried out by national governments," the study said. "The Libyan government's also to the fact that the spirit of the act marks this nation's comassassination campaign against dissidents living in Europe and the mitment to full equality for all exchange of terrorist attacks on diplomats in the Middle East were the most noteworthy examples."

Rightist Activity

The CIA also noted a sharp increase in rightist terrorist activity in Europe, with bloody attacks at the Munich Oktoberfest and at the railroad station in Bologna, Italy, ranking among the worst terrorist incidents recorded.

The CIA said that the Russians are deeply engaged in support of revolutionary violence and that "such violence frequently entails acts of international terrorism."

As for the Libya, where the Russians sell large quantities of arms, the CIA called the regime of Moamer Qadhafi "the most prominent state sponsor of and participant in international terrorism."

In addition to a clear and consistent pattern of Libyan aid to almost every major international terrorist group, the report said, "our records list 14 attacks by Libyan assassination teams in Europe and the United States" last year.

retaliation there.

on a collision course over interest rates and the Bank for International Settlements (BIS) has come down squarely on the side of the Europeans. It isn't that the BIS is opposed to an all-out fight against inflation by the Reagan administration, which implies high rates. It is rather that the bank, which is owned by its member central banks, fears that the social and political costs of battling inflation with strictly monetary means will be intolerable. The argument runs as follows: Europeans respond to the high U.S. rates by raising their own rates to keep money from flowing into dollar investments. That squeezes the European economies, some of which are already recession-bound, forcing up already high unemployment rates. And when those rates pass a certain unpredictable point, social disruption with the attendant political pain will result.

The United States is aware of Europe's displeasure. Prime ministers and foreign ministers have trooped to Washingtoo and complained. But the United States has made it clear that it plans to keep interest rates high. Murray L. Weidenhaum, chairman of the U.S. Couocil of Ecocomic Advisers, told a gathering in Paris recently that the United States had oo intention of reducing interest rates until inflatioo was hrought under control. Mr. Weidenbaum also indicated that the United States was not interested in negotiating with the Europeans and Japanese over interest rates at the upcoming Ottawa economic summit in July or at any other time or in any other place.

The Europeans, having heard Mr. Weidenbaum's rather intransigent-sounding warning, have decided, nevertheless, to make a discreet approach to the United States in Ot-

the subject this week.

Western Europe and the United States are tawa. Ironically, British Prime Minister Margaret Thatcher, who has been trying to solve her own country's economic ills with a monetarist approach, is in the EEC chair and must deliver the message. The recommendation can be expected to follow the general outlines of the BIS report, which suggests that some fiscal measures be taken so that interest rates can be allowed to fall. The bank even calls attention to the fact that incomes policies, short of full wage and price controls, are being used effectively in several countries, including West Germany. But the Reagan monetarists and supply-siders are unlikely to buy any kind of controls or guidelines, at least in the oear future.

European leaders, including French Finance Minister Jacques Delors, have said that the United States cannot expect the Europeans to go along like good little allies on defense and foreign policy initiatives and then ignore the impact of high U.S. interest rates on their economies. But life is more complicated than that. First of all, the effect is not uniform. There are those who say that the French franc, for example, is just where it should be against the dollar and that the French aren't really all that coocerned about the U.S. rates because the West German mark is taking the real heat.

The critical points, though, are the following: Industrial economies are interlocked; mutual interests are affected by shifts in U.S. interest rates; those rate shifts affect the strength of the dollar and therefore the price of oil and everybody's energy bill, since oil is priced in dollars. As a result, interest rates seem not only an appropriate subject for discussion between the United States and its allies, but a necessary one. INTERNATIONAL HERALD TRIBUNE.

-Letters_____ The Israeli Raid on Iraq's Reactor

• J.

Your editorial (IHT. June 10) finds the Israeli raid on Iraq "m-derstandable" because of a poten-tial threat to Israel. Many Israelis also the effort of your own edito-rialist, who, after several weaseling paragraphs, reaches the truly asalso feel threatened by demo-graphic trends which will lead to their being outnumbered by the Palestmians in their midst in the future. Would you also "understand" Isreali genocide of the Palestinians? Is there, indeed, any action Israel might take which you would object to? This Israeli raid, along with the mass explusion of Palestinian civilian population from areas coveted by Israelis seeking increased Lebensraum over the past decades remind one of nothing more than Hitler's trampling on others in quest of Nari begemony in Europe. Would you equally "understand" an Iraqi raid on Israei's nuclear facility, which, unlike the Iraqi one, is not open to international inspection? Israeli military dominance of its neighbors for the past 30 years shows that it is they, not "tiny" Israel, that are threatened. H. CLARK GRISWOLD.

London.

As a European resident for 10 years, I read with interest the edi-torials on the Israeli raid. The In-ternational Herald Tribune's thoughtful remarks, contrasted with the surprisingly regional ones of The New York Times and The Washington Post, spoke eloquent-ly of the IHT's "mid-Atlantic" view of world events.

RICHARD D. GRAHAM. Paris.

Who will answer these questions: Why does an important oil-exporting country like Iraq need expensive nuclear power as a source of energy, when it can fill its needs with cheap oil? Why, therefore, does France,

and to a lesser degree Italy, supply nuclear equipment to such a com-

try? Why do those who criticize Israel for the destruction of the Iraqi nuclear plant not propose an alternative practical course of action for Israel?

Why does Iraq now cry "wolf," when in September of last year, not in a pre-emptive attack of selfdefense, but as an act of brutal ag-

gression, they invaded Iran? Why is it lawful and responsible for the United States to invade Iran with aircraft and men for the liberation of a few hostages, but unlawful and irresponsible for Israel to destroy a plant that was capable of providing the means for the total destruction of Israel and

its population? Could this be the answer to these questions;

It has nothing to do with international law and morality, but with international hypocrisy. For nations do what they consider to be in their national interest.

A. NEUMAN. Montreal.

energy generated by the atomic plant" will be used only against the "Zionist entity."

crease in real annual appropriations that is projected from 1980 to 1986 - a leap from 5 to 7 percent of a rising gross national prod-UCL.

The evolving strategy rightly shifts the emphasis toward the most likely military cootingencies. It cootinues to prepare for the greatest but least likely dangers - a strategic ouclear conflict or a short, high-intensity war in Europe. But it also seeks new capabilities for protracted cooventional war in several regions at ooce. That requires reshaping some heavy NATO-oriented forces and equipment for mobility and desert war, revitalizing reserves, expanding stockpiles. It means restoring industry's ability to mobilize, as urged by Uoder Secretary of Defense Ikle.

The Soviet Union can fight a long war in several theaters. It has acquired the ability to project force far beyood its borders. Gulf oil is the most vital Western interest thus endangered. But others could be threatened by lo-

The conflict may come to a head within a.

And a multi-theater conventional war would far exceed America's capacities.

A recent study by Prof. William Kaufmann of MIT shows that the Reagan budget could close this gap --- if the money were wisely spent. Only small increases in forces are needed. Most of the money should go for the state of preparation that experts call force readiness; for improvements in manpower and reserve units; for transport, stockpiles, mobilizatioo preparations and for less sophisticated weapons.

But even Reagan's new funds won't be oearly enough if, as the 1982 budget suggests, huge sums are spent on unnecessary supercartiers, a 600-ship fleet, decrepit battleships, across-the-board pay increases, a revived B-1 bomber and, with SALT delayed, a new strategic weapons race. The consensus for more speoding is unlikely to survive such extravagance

rules and even secret elections.

THE NEW YORK TIMES.

South Africa: less condemnation of its racism, less confrontation, more attempts to persuade and to recognize common interests. The assistant secretary of state for African affairs, Chester Crocker, is now on his second visit to South Africa. This time he is accompanying the No. 2 man in the department, Deputy Secretary William Clark.

The changed diplomatic attitude toward South Africa has aroused sharp criticism from black African leaders and from a number of American groups. There is obviously reason for concern in the possibility of the United States identifying itself with a state based on white supremacy. But the issue is not as simple as that.

The first priority of the Reagan people in Africa, as of their predecessors, is to find an internationally acceptable path to independ-ence for Namibia. That is the huge land ruled by South Africa for the last 60 years as South-West Africa. A low-level guerrilla war has been simmering there for years.

A Western plan for elections, supervised by the United Nations and leading to independence, was one of the notable examples of leadership by the Carter administration. But in the end, last winter, South Africa said no - and by all signs its government has never re-ally made a decision to get out of Namibia.

Sanctions

What, then, can be done about Namibia? One course, pressed by African states, is to apply econom ic sanctions to South Africa. I think that idea is a dangerous illusion. There is no reason whatever to think that sanctions would work against a country as strong and economically self-sufficient as South Africa. The victims of sanctions would

actually be the dependent black states nearby - as Robert Mugabe of Zimbabwe has been realistic enough to say out loud.

The alternative Reagan idea is to work for arrangements to assure a certain stability in an independent Namibia, and then to convince South Africa that letting go on those terms would really be in its interests. At the same time, in the Reagan view, steps should be taken for a political reconciliation in Angola that would, along with a Namibian settlement, see the Cuban troops in Angola go home. Can it work? Given the long his-

tory of suspicion and war, the odds are against it. But the fact is that for those who want an iodependent Namibia, the Reagan administratioo and its policy are the only game in town. Nothing else - not sanctions, not angry speeches --can possibly convince the party that above all has to be convinced. South Africa.

One test will be of the realism of South African leaders - and their understanding of the American system. Some of them have reacted to the Reagan policy on Namibia in angry disappointment. They evi-

They may find Ronald Read congenial than other American politicians, but he is president and as a conservative he has a chance of convincing South Africa that it should leave Namibia. Robert Mugabe surely appreciates that, and Clark and Crocker are

Of Mediterranean Tension

ROME — The bombing of from the north. The increasingly explosive situation in the southern the Italian caretaker government as much by surprise as everyone else. It has also introduced a new element into a political crisis that is already sufficiently complex. The underlying concern is the

politico-military situation in the southern Mediterranean. The Italian government has tried hard to maintain the best possible relations with all the Arab states of the Middle East. The oil flow from Libya has increased to a substantial percentage of the Italian global import, while Iraq has become an important buyer of Italian products, in particular mili-

tary hardware. Although careful to comply with the rules of the Nuclear Nonproliferation Treaty, the Rome government, with its delivery of nuclear technology to Iraq, has risked straining U.S.-Italian nuclear cooperation

But Rome has been quite cooperative with Washington on anothaero-naval bases facing the Rus-sians in southwest Asia requires

the use of large logistic facilioes in the Mediterranean. The Italian peninsula provides

ideal conditions for that purpose and a fresh round of bilateral negotiations with U.S. representatives on this subject has progressed smoothly during the past months. Smoothly but discreetly, because the Rome government wants to keep a low profile on matters concerning its military posture in the southern Mediterranean, the Mid dle East and the Gulf.

The Israeli raid has obviou projected the Middle East quest on the foreground again. The po erful Italian Communist Party grabbed this opportunity to pr its views on these sensitive issue right when negotiations for the f mation of a new government are a critical point.

The government that will co out of the present crisis is bou to face, unwillingly, a number politico-military problems, wh certainly existed before, but are acerbated now by the mount tension in the Middle East.

Italy's military posture for past 25 years has been essenti directed to face a threat com

That is lantasy, and the Real policymakers do not in fact believe it. They should make clear that they have a more limited, more facts: practical view of what is necessary and possible to get the Cuban troops out of Angola. \$1981, The New York Times

Italy and the New Theater 2. To terminate Osirak's existence is one thing. To boast about it and to insult other countries is much more than bad taste. It humiliates Iraq, and, through it, all the Arabs. Furthermore, it makes the position of the United States, Egypt, France and of all the coun-

By Enrico Jacchia

Mediterranean and the forceful policy pursued by Israel, which is perceived in Rome as a U.S. ally in the Middle East, now point, how-ever, to a potential threat coming from the south.

At least three factors have contributed to create this new situation. First, the presence of a pow-erful modern Soviet fleet, which still has no adequate naval bases in the Mediterranean, but may rely on the missile sites and on a network of air bases under construction in Libya capable of receiving large contingents of airlifted forces of the Red Army.

The second factor is the progressive Soviet penetration in northern Africa, mainly through Col. Moamer Qadhafi's initiatives. which may destabilize that area and increase the threat from the south. And a third factor is certainly the more active military posture of the United States in southwest Asia.

As a consequence, another theater of potential military operauons, as important as the European one, becomes a reality south of Italy. The problem is that, in spite of Italian and NATO efforts, the southern part of the peninsula appears most exposed, militarily, in this new scenario.

These are issues that deeply divide the Italian' political world. There is a reluctance to deal with the politico-military problems that are involved and may affect rela-tions with the United States. Yet, the premier who will succeed the present caretaker government cannot avoid taking a stand on these issues. Both the Italian left and

In spite of being an Arab, I con-gratulate and appland the way the raid was carried ont. Crossing such a long distance in Iraqi territory to destroy such an installation shows a very advanced military ability.

London

To us the Arabs, particularly to Iraq, it is a sorrow, a typical de-feat. I thought the demolishing of the Egyptian airports in 1967 was the last time Arabs would be so careless. After this raid I hope the Arab world will realize that more co-operation and strategy are needed, because without it we will remain defenseless forever, we will remain humiliated forever.

ASHUR AHMED AL-MUGBEL Barcelona.

Your astonishing one-sided edi-torial about Israeli's raid on the Iraqi reactor is disgusting. You can't justify Israeli's raid unless you believe that Israel should possess nuclear monopoly in the area, assuming that Iraq intended to make ouclear bombs, which is not the case, as evidenced by UN su-Dervision.

This raid proves Israeli's determination to be the guardian, the only power of the area, and to conquer more land. Israel by this and other acts proves that it doesn't really care about establishing a peaceful coexistence with the Arab world.

Your article clearly show how blindly one-sided you are.

Party's Not Over Yet in Poland

Seventy-Five Years Ago June 17, 1906

LONDON - London has of late become a city of bad smells and fearful noises. That terrific innovation known as the motor omnibus is at the bottom of it all. When there were only private automobiles, the odor was bad enough. But the huge, clumsily built motor buses bring both smell and noise, and their noise is unlimited.

Fifty Years Ago June 17, 1931

CHICAGO - Al Capone, Chicago's most ballyhooed badman, pleaded guilty this afternoon to having defrauded the government through falsifying income-tax returns and conspiring to violate the Prohibition amendment. Capone's appearance was expected to open a costly legal fight against the government's charges.

er sensitive matter in the same geographical area. The building up of a powerful chain of American

Student Leaders, Separated by Race But United by Goals, Held in S. Africa

By Cynthia Stevens The Associated Press

ragist

JOHANNESBURG - Aziz Jardine, a detained student leader, reportedly had welts on his back when security police brought him in handcuffs to his home in a mixed-race township to search his room.

The 18-year-old high school student of mixed race, the youngest of 13 children, told his mother he had not been able to wash for three days.

The initial treatment of University of Cape Town student leader Andrew Boraine, 22, son of a prominent opposition member in the all-white Parliament, apparent-ly was not so rough. His indefinite detention - also under the Inter-nal Security Act - was no less heartbreaking for his family, how-ever, and all the more frustrating for critics of the white-minority government's scurity legislation. Mr. Jardine and Mr. Boraine.

along with two. black university student leaders, are among at least 152 persons believed to be held without trial in South Africa.

Different Backgrounds

There are few similarities in the backgrounds of the two young men because under the country's 30-year-old racial segregation laws, South Africans live and are educated, at least through secondary What the student leaders have in

common is opposition to the ruling as National Party of the Dutch-descended Afrikaners; specifically, their efforts to organize boycotts of festivities leading up to the May 31 Republic Day, which apparent-

ly landed them in jail. [Nothing has been said about the reason for Andrew's arrest last month but it is presumed to be related to a rally the student leader addressed at the University of Witwatersrand in Johannesburg at which some students, mainly blacks, burned a South African flag, The New York Times report-

Mixed-Race Protests

[A series of bombings, attributed to the banned African National Congress, also coincided with the official celebrations. The state-owned broadcasting

company has presented a conspiracy theory in which campus activism, flag burning and terrorism as different aspects of a single menacing phenomenon. The security police has long sought links between white student groups and black underground movements, the Times reported.)

For the student leaders, there was no cause to celebrate in a country that denies political rights

school, with people of their own and equal economic opportunity to the 23 million blacks. Asians and people of mixed-race, known coloreds.'

Mr. Jardine's detention in late May sparked protests in townships west of Jobannesburg early this month by mixed-race colleagues who demanded his release. Reports of police brutality against the demonstrators prompted Asian and mixed-race pupils in Cape Town and Durban to protest, resulting in the closure of four schools for a week and suspension of more than 700 students.

Mr. Jardine's mother, Fatima Jardine, told South African reporters that when police escorted him home they demanded to know the source of something be said.

"He asked me to bring him his history book, and I had to bold it while he turned the pages because he still had the handculfs on. He found the section on the Russian revolutioo and found the reference and showed them it was part of the history syllabus," she said.

"One policeman said he had never been taught that at school, hut the major told them to forget it. I think he was embarrassed that it was in the school history book."

After a visit to Modder Bee Prison east of Johanneshurg, Mrs. Jar-dine reported that her son was well. She said police had advised her that he would be held for about a month.

Afrikaners Fear Exposing Black Past, Debretts Says

ed.

The Associated Press LONDON - Afrikaners, South Africa's ruling white minority, are reluctant to have their lineages traced for fear these will show black ancestors, according to the head of Debrett's Peerage.

"They are just not interested and they have made it clear to us why," Harold Brooks-Baker, managing director of the London pub-lishing house said Monday. Debrett's is best known for tracing the genealogies of Britain's aristocгасу.

The Afrikaners, the descendants of South Africa's Dutch settlers, comprise 60 percent of the 4.4 million white minority and rule South Africa with a policy of apartheid, or race separation.

"Many Afrikaners have told us that the problem with conducting research into their families is the possibility of mixed ancestry being exposed," Mr. Brooks-Baker said.

Women Left Behind

"It is because the original Dutch settlers were real pioneers," he said. "Unlike the English, they did oot take their women with them The inevitable happened so Afrikaner families often have at

least one black ancestor." Mr. Brooks-Baker estimated that 35 to 40 percent of Afrikaners have some black blood.

Mr. Brooks-Baker said the Afrikaner's fear of looking up the family tree has emerged during the last few years, when Debrett's has pro-

"In Europe and in all stable communities, people are only too bap-py to talk about their ancestry, be black, Jewish or whatever else." "But if you build up strength, politically and socially, feeling there is a difference between races, this type of problem is bound to come about," he said. "It is rather

S. Africa Churchman **Drowns at Baptism**

The Associated Press JOHANNESBURG -A Baptist ninister, the Rev. James Gazele, 43, drowned as he prepared to baptize four new church members in the Silver Park River, the Rand Daily Mail reported Tuesday.

Another Baptist minister at the baptism said, "Mr. Gaxele stepped in the river and prayed for a min-ute, He said, 'Lord, I am coming to baptize these people in the name of the Father, the Son and the Holy Spirit' As he said the words 'Holy Spirit' he sank into the mud. then I realized that he was drown-

Andrew at a prison in Pretoria that his son was concerned about the possibility of being banned. An-drew is president of the National Union of South African Students. The government imposes ban-

ning orders against its critics to prevent them from being quoted, meeting with more than one person at a time and to forbid them attendance at public gatherings. The Institute of Race Relations a private, anti-apartheid research body - said 161 persons, most of them black, are known to be

banned. Alex Boraine said his visit "reinforced my long-held view that bannings and imprisonment without trial are the symptoms of a very sick society. These summary punishments are inflicted on those who find the South African society

abhorrent and are prepared to speak out against it." When first taken into custody, Aziz Jardine and Andrew Boraine were held under an act that denied them access to lawyers, courts or their parents for two weeks. Now they are held under the terms of

lows them two 30-minute, noncon-tact meetings a week and unlimited access to lawyers,

Rajiv Gandhi, son of Indian Prime Minister Indira Gandhi, was welcomed by his wife and daughter at New Delhi airport Tuesday after his successful campaign for a seat in Parliament.

Rajiv Gandhi Welcomed By Backers in New Delhi

Threat of Banning NEW DELHI --- Rajiv Gandhi. Alex Boraine, the liberal Pro-gressive Federal Party spokesman on education, said after a visit to son of Prime Minister Indira Gandhi and a powerful new figure in Indian politics, returned triumphantly to the capital Tuesday after easily winning his own seat in Parliament. Mr. Gandhi, 39, led his mother's

ruling Congress (1) Party to victory in weekend by-election results. The Congress Party captured five parliamentary seats, a gain of one over opposition parties, with ballots in two more races still to be counted. Mr. Gandhi, who had cam-paigned day and night for a month across the sun-scorched north Indian plain, was greeted at New Delhi airport hy his Italian-born wife, Sonia, and a throng of youthful party workers chanting, "Long live Indira Gandhi. long live Rajiv Gandhi."

The style was reminiscent of noisy rallies for his late younger hrother, Sanjay, whose vacant par-liamentary seat he won. But Rajiv Gandhi, who has promised a new style of more serious politics, commanded the chanters, "Stop this circus.

In state assembly by-elections, Mrs. Gandhi's party won all 12 seats announced in Uttar Pradesh, Bihar and Karnataks states, It also

munist-ruled West Bengal state, trailing the Marxist Communist Party two seats to four. Rajiv Gandhi received 100,000

more votes than Sanjay had, with a total of 258,884 votes, 84 percent of the 307,523 cast. The nearest of his 13 foes polled only 21,188. Sanjay Gandhi was killed in a plane crash while doing air stunts a year seo.

Active Missile Lost in Bavaria

BONN - West German police and air force helicopters searched Tuesday for an air-to-air missile that was accidentally dropped from a fighter aircraft over northern Bavaria.

The U.S.-designed Sidewinder, painted white and nearly 3 meters (9 feet) long, could explode if touched, an air force spokesman

warned in a radio interview. The missile was lost Monday by a Phantom fighter during a training flight over the Nuremberg area, but the pilot did not notice it was missing until after he landed. The spokesman said that a technical fault was almost certainly the cause of the incident.

During Life-or-Death Aerial Skirmishes

By Malcolm W. Browne New York Times Service

NEW YORK - Since World War 1f, radar and anti-radar technologies have come to dominate human warfare, but a scientific study suggests that human achievements in electronic warfare are incomparably cruder than the equipment used by bats and moths locked in struggle for survival.

In a report published by the journal American Scientist, biolozists M. Brock Fenton of Carleton University, Ottawa, and James H. Fullard of the University of Toronto conclude that bats and moths constantly improve their tacties to gain short-lived advan-tage over each other.

Donald Griffin of Rockefeller University made the landmark discovery in the 1930s that bats navigate and locate prey by listening to the echoes of sounds they emit while flying. More recently it was discovered that the hearing organs of moths can detect the approach of a bat long before the bat detects the prey. Prof. Fullard says some moths have apparently developed jamming signals that sound enough like bat echoes to confuse an attacking hat and induce it to veer away sharply.

2 Auditory Neurons

"The amount of information that a moth can receive, process and use in making complex survival decisions is staggering, consider-ing its very limited equipment." Prof. Fullard said.

A moth's hearing organ is likely to be on its thorax, but may also be on its abdomen or in its mouth. "Information from that organ must get into the animal's central nervous system via no more than two auditory neurons," Prof. Fullard said. "That's far too few to allow it to distinguish between frequencies, but the physiological ap-paratus itself is often tuned to be sensitive only to those frequencies likely to be emisted by a bat. It is less an ear than a bat detector."

The cries of a bat are mostly far above the range of sound audible to a human being. People can hear sound from about 20 vibrations per second up to about 18,000 virations per second. The sounds a bat emits to locate obstacles and prey may extend to as many as 230,000 vibrations per second.

Bats vary the length of their calls, sometimes sending out pulses of sound less than one-thousandth of a second long as they move in on their prey, and making lastminute course adjustments to compensate for the prey's violent evaions,

But the main variations in bat calls iovolve frequency and har-

monics. Bats use different kinds of sound to obtain different kinds of

information about targets. One bat call is a steady tone that allows the bat to estimate the speed of its prey and the direction of its flight. The system exploits the Doppler effect that causes the familiar fall in pitch of an automobile horn as it passes a listener and recedes. The bat call is reflected from the target insect, and the bat's brain compares the pitch of the sound it sends out with the pitch of the echo to estimate veloc-

ity and direction. Another kind of call is required for accurate location of the target. and this employs frequency modulation or change of pitch. Echoes from falling-pitch calls are heard slightly differently by the bat's two cars. and its brain interprets the difference in terms of the heading

to its signals, until natural selection catches up and properly tuned moths evolve. "It's a very dynamic process," Prof. Fullard said, "because the bat and moth populations are constantly changing and their rela-tionships change. Most insectivowhich huckles under pressure from rous hats eat a wide variety of insects besides moths, but in spring, lactating mother bats seem to have a marked preference for moths.

That increases predation pressure and forces adaptation on the moths. It's a never-ending cycle. "But the amazing thing is the sheer volume of information processing and profound neurological decisions handled by both the hats and the moths, using a very limited number of nerve cells. They exhib-

it a degree of economy and sophistication that could be the envy of human acrial warfare strstegists."

United Press Inte ISLAMABAD, Pakistan - Pres ident Mohammed Zia ul-Haq has issued a new regulation giving martial law authorities broad powers 10 fine, flog and imprison for up to five years anyone involved in

agitation or subversive activity. The regulation covers civil ser-vants and employees of govern-ment corporations such as Pakistan International Airlines, the national steel corporation and banks, It empowers military authorities to dismiss or prematurely retire a person from service or, if a military officer, to strip him of rank.

The new regulation apparently was prompted by an employees' work slowdown at the airline. The Pakistan Times reported Sunday

that the company was "facing extremely serious difficulties resulting from poor management and union activities," and implying that some cabin crews were engaged in smuggling.

Films Paul Newman Gives Vivid Portrayal of Police Life

By Thomas Quinn Curtiss International Herald Tribune

DARIS - The cinema customarily shies at hot-potato issues, but it appears to be edging into the 1980s with a newfound candor.

Exhibit A this week is Paul Newman's latest vehicle, "Fort Apache, The Broux" (billed in France as "Le Policeman"), with its bold, sweeping examination of crime at large in a mean New York City quarter. Its protagonist is our old friend the cop with a conscience, but he has been drawn with an unadorned honesty that makes him absolutely believable.

The script is free of most of the cliches. No pretty, blonde social worker invades the gasbouse district to preach the golden rule to hoodiums oor does a kindly clergyman pop up to propose baseball as a remedy for juvenile delinquency. The hooest policeman does, true enough, have a confidante in a trained ourse of whom he is enamored and to whom be tells his troubles, but she breaks the rule of keeping supper on the stove while he is out making midnight arrests.

In large measure the scenario is realistic, almost to the documentary degree. A prostitute of the neighborhood, demented by drugs, murders two patrolmen as they inspect the streets in their car. An indiscriminate roundup of suspects causes a protest riot and in its course a Puerto Rican youth is pushed off a roof by two of New

York's finest. The bland dismissal of this killing — as though murder of the sort were in a day's work --fires the protagonist with such indignation that he, after years of service, turns in his badge.

Daniel Petrie has directed intelligently, extracting the cinematic maximum from the material. He has succeeded in conveying the throb of suppressed violence that ticks like a time bomb in the sleazy quarter and bestows a reality on its wretched inhabitants, while sustaining the surface excitement of the narrative. As the disgusted police officer. Newman contributes a top-flight performance aided by a sturdy supporting company; It is an extraordinarily well-balanced

sample of American moviemaking. (At the Marignan-Concorde, the Quintette-Pathé and the Gaumont

Les Halles in English.) Raymond Depardoo's "Report-ers" covers the daily duties of

press photographers of the Gamma agency, recorded by hand-held cameras as they cover news events. The missions on which they are

dispatched are singularly timely, concerned mainly with the recent French presidential campaign. Mitterrand and Rocard are snapped at rallies, Marchais accepting nomination as the Communist candidate, Giscard d'Esta-

Show folk and social celebrities are constantly being "shot": Mireille Mathieu, Gene Kelly, Mireille

Darc, Richard Gere, trying to escape the inquiring cameras; Jean-Luc Godard pontificating at the Cinémathèque Much of this might be viewed ---

much of it has been - oo televi-sion, but in the editing an occasional caricaturing touch lends humor and viewpoint. The wrangles between staff and editor on assignments and vacations are overlong. (At the Saint-Andre-des-Arts.

* * * The Canadian film "Ticket to Heaven," is another instance of the cinema's rare entry into controversy of any sort. Produced by Ronald Cohen and directed by

R.L. Thomas, it deals with the pro-selyting of religious cults, of their entrapment of unwary youngsters, the brainwashing, accompanied by a weakening diet and drugs, and the subsequent reluctance of the

captured to regain their liberty. The screen has treated the subject only --- and then superficially - in a poor movie about the Jonestown mass suicide, but it is certainly a matter of current inter-

How elosely this fiction resembles the facts of actual cases one ing at an Elysée reception, Chirac can only guess, but it has chilling making the rounds of shopkeepers, plausibility. Diderot, in "La Reli-

and the clown Coluche making his gieuse," told of a young girl forced to become a oun, and family ty-All, however, is not poblics. rants imprisoned unwanted women in sacred orders in earlier times. The practice here is reversed.

A Toronto schoolteacher in his early 20s, uncertain of his future and disappointed in a love affair, goes to California on holiday. An old acquaintance, seeking to cheer him up, introduces him to a set of strange but jolly young people and he is unwittingly converted to a weird faith and sinks into brainless submission. The efforts of his family and friends to break the hold of the cultists supplies the action of the story's second half.

There is effective acting by Nick Manuso as the victim of woozy soul-saving, by Saul Rubinek as the practical-minded nightclub entertainer who organizes his liberation, and by Meg Foster as a sinister high priestess. Thomas' direc-tion supplies a gripping thriller on an intriguing cootemporary theme. "Ticket to Heaven" was shown at the Cannes festival out of competition and impressed many reviewers. It is probably to be included in the Venice festival's program in August and will be gener-ally released thereafter.

Arts Agenda

A man easy A magnet ARRENET BRUESELS — The find production of the season at the Theatre Royal de la Mannale, Maurice Holeman's 22d and final season as director of the theater, is "La Muette," a "to-tof" spectrate scorg and damaed by members of the theatre's various units — the Belgian National Opera, the Bellet of the 20th Centu-ry, the Opera Studio and Mudra — and us-ting manife from a surely of anome Mandra ry, ma Opera stocal and neutro — and as-ing manic fram a variety of operas. Mourice Bélart and Bernard Da Coster are the joint stage directors, Thierry Scoquet is the design-er, and Rosch? Zollman the conductor. Per-formances are scheduled through Jame 27.

PARIS ---- The Calck Hook Dance Theater will present "The Kalfe Against the Wave," for five descent and three muticians, June 17 at the Paris Massum of Madern Art (16 Ave-nue de New York). Chorsography is by Doris Seidem and Wendy Shankin and the music by Fric Walson.

Seiden and W Eric Watson,

. . .

WEST BEBLIN --- The world premiere of "War and Pacco," a new ballet by Volery Panov based on the Tolstoy novel and set to music assected from works of Tchalkoysky, will have its premiere June 27 by the ballet of the Deutsche Oper. The work, in three acts and 30 sonner, will have a cast headed by Golina Panova as Natasha, Frank Augustyn and Panov atternating as Fierre, Vladinsir Gefvan as Prince Andre, Haldrun Schwaarz as Halen, and Panov and Spadar Netmethy Itemping as Napoleon. Sets are by offernating as Napoleon. Sets are by Gotther Schneider-Schemen and costimues by Leo Bel, and Michael Heise will conduct. Later performances are scheduled for Jene 28, 30, July 2 and 5.

Lifestyles____

'Nouveaux Pauvres' Mourn Paris Social Life

By Hebe Dorsey International Herald Tribune

DARIS - To dance or not to dance, that it is the question. The oew Socialist regime has been like a cold shower, a slap in the face of the traditional Paris season. In June last year, Paris ran out of orchestras and orchids, black ties and ball gowns. No more.

First hit are the very rich, who now call themselves the nouveaux pauvres. But they still drink champagne. The nonveaux riches drink beer — at Maxim's, what's more. Max-im's, by the way, is still full, but it's not the same crowd somehow. Less preppy, so to speak. You have a lot of rich foreigners, big spenders who were buying airplanes at the Paris Air Show or watching their borses win at Longchamp, plus a sprinkling of habitues, looking about nervously to see who, of the club, is still around ...

The oew poor have ways of telling you their problems that make you want to cry. Like the duchess who announced that her busband had decided to close down the country house and fire 80 servants. "We'll just have to cope," she said. How many ser-vants did they have before? The deadpan, isthere-any-other-way answer was 130.

Protecting the Homestead

Still on the château circuit, a baron was confiding over lobster the other night how things were, yes, getting tough. He was oot really worried about "the little house" with its scant three acres, no, that was safe enough, but the châtean, my dear, the château. Never mind. Since the time of the French Revolution, which the baron quite seriously likened to the present, they've learned to cope.

Another friend said well, that's it, never again will I be able to put 20.000-franc bills for Saint Laurent dresses through the accounting department. No way I can charge that to business. "My husband," not to mention their accountant, "simply won't put up with it anymore."

Sure Sign of Something

When a friend who used to order Dior couture, the same outfit in three different colors; can be found buying Ungaros on sale, you know for sure that something has changed in Paris. The same friend announced recently that she has just received her bill from Dior and that she will never again make such purchases. "What for, dashrling. What's the point of buying ball gowns if I have nowhere to wear them.

If the French are ducking out (let's face it, they're always looking for a chance not to spend money) Paris-based foreigners are still giving parties. But even they have cut down on the bravado. A recent large party, a guest reported, was just as glamorous as ever exoept, sigh, no orchestra. Another famous hostess sent an invitatioo for late June but the tenue, this time, is de ville - meaning goodbye ball gowns.

People are wondering what's going to hap-pen to the lofty world of couture. The collections will be shown as usual at the end of July. Heads of fashion houses tell you publicly that nothing has changed yet and we just have to wait and see. But privately they are moaning. A lot of orders have been canceled and, if the truth be told, at Prince Charles' British Embassy ball last week, many women were wearing last year's red dresses - the same they wore at Nelson Seabra's Red Ball. Not to mention that they also were them at last month's Lido Red Dress premiere.

It is not just the very rich who are complaining. Ordinary people from the bour-geoisie are miffed too. Such as that whitehaired, upper-middle-class woman who announced in a very distingue and uptight voice at the hairdresser the other day that "my son will simply have to wrap his tails up in mothballs oow. When the president of France receives the diplomatic corps in veston, you know there wou't be much room for tails anymore." A well-known horse-racing journalist admitted that at Chantilly's Prix de Diane last weekend that there, too, fashion decorum has gone by the wayside. "Id brought my bowler along," he said, "but I quickly left it at the checkroom." Which looked funny since he was still wearing tails.

Success Formula: Piano Lessons and Ignored Mail

Personalities

By Michael Zwerin ational Herald Tribune

DARIS --- Peter Sprague used to take piano lessons upstairs in East Side Manhattan town the house from which he runs his empire. He could duck a lot of routine calls that way. His secretary would say: "Sorry, Mr. Sprague is

taking his piano lesson." "You'd be amazed bow fast that scared people off," said Sprague, 42, looking extremely pleased, and at the same time sorry to have been forced by mundane pressures to have stopped the lessons. One of Sprague's most impressive achievements is running a business empire with only one employee. He does this by "not answering my mail. Most paper work people do doesn't really have to be done."

Sprague loves trouble, challenge, solving the insolvable. Once everything is going well, he'll be out looking for more trouble to get into. Business has got to be interesting and fun for Sprague, and the trouble-fun-learning factor is as important to him as the figures.

Ongoing Education

"I want to learn about something I know nothing about," he said recently when here for the Paris Air Show ("to look at some executive jets"). "I have not yet

ualist American shunned his father's big business, Sprague Elec-tronics, by buying into National Semiconductor, a small company about to go under. He was 25 at the time, just out of graduate school. It was 1964, semiconductors were in their infancy. The company had a gross of \$3 million a year. He and his partners shook up management and eventually added a few zeros to that. He's became its chairman at the age of 26; of the company's 35,000 employ-ees, only one has been with it longer than he has.

But he does oot deal with daily nanagement; only certain sales, finance and strategy questions. Unfortunately, the freedom of time this allowed him got him into some unmanageable real-life trouble in the movie business. He had to sell two-thirds of his 3-percent stock interest in National Semiconductor (it is now worth four times what it was worth in 1973) to finance and produce "Step-penwolf," the film of Hermann Hesse's oovel that starred Domi-

moue Sanda and Max voo Sydow. Sprague was hooked by Fred Haines, the director, an intellectual who had written the screenplay for the film of James Joyce's "Ulysees," when Haines beat him at chess. This does oot happen so of-

Entrepreneur Peter Sprague.

mayor of New York City, in a Manhattan district so utterly Democratic that oo other Republican candidate could be found. It was bopeless.

All of this activity has been hard on his personal life, since Sprague splits his week between Suttoo Place in Manhattan and Lenox, Mass., where his wife and four sons live. But he obviously feels

"Running one of them into a wall for a bumper test is very pain-ful, financially, emotionally and physically," Sprague has been quoted as saying. But the fun part of the business was "building high-quality, limited-edition cars. Aston Martin clearly is an anachronism. I felt I was preserving an art form." He sold his interest last year because "for five years we were constantly within one month of going out of business. You can't live with that kind of tension. Anyway, in the beginning I said I just wanted to prove it could be saved, leave it in better condition than I found it and get on with life. That's what I think I did." He is still Astoo Martin's U.S. distributor.

On to Genetic Engineering

In between he took Advent, a company that makes large-screen television sets, out of receivership; it went in again, he saved it again.

Now he's looking into genetic engineering. "I don't know any-thing about it, but as an entreprenent I have carte blanche to stick my cose into this whole oew world. It's fascinating, and it gives me an excuse to spend time with some really fascinating people. So I'm learning and at the same time not just wasting time, I know that at some point I'm going to jump it. I didn't know anything t the semiconductor world I started either, but I certain-

CONNAISSANCE DES ARTS. THE WIDEST CIRCULATION . ART MAGAZINE IN THE WORLD, IS NOW OFFERING AN ENGLISH LANGUAGE EDITION.

Unlike most art magazines, Connaissance des Arts does not limit itself to a specific area, such as modern painting or antiques.

Rather, the whole spectrum from painting to sculpture, archeology to architecture, furniture to interior decoration and photography to porcelain is presented in the unique style which has made Connaissance des Arts famous.

Market trends, important exhibitions and private collections of every major country are analyzed by recognized experts.

Neither the art market professional nor the interested observer can afford to miss this offer for the English language edition of Connaissance des Arts.

A copy of the most recent issue of Connaissance des Arts (English edition) will be sent to you, if you are among the first bundred to request it.

Small Nation Is Cornerstone of Gulf Cooperation Policy

By Ken Whittingham

THE SECURITY, stability and future prosperity of the oil-rich Gulf region lie not in the shadow of superpower protection or in the presence of a regional "policeman," but in cooperation between the states of the. region

This concept became official policy for six Arab Gulf states - Saudi Arabia, Kuwait, the United Arab Emirates, Qatar, Bahrain and Oman — when their heads of state as-sembled in Abu Dhabi in May to sign an ac-cord establishing the Gulf Cooperation Council

This policy is not a result of recent upheav-als in the Gulf — the revolution in Iran and the Iraqi-Iranian war — although such events have undoubtedly added impetus to the initi-ative. The emir of Qatar, Shekh Khalifa bin Harad a construction of the second s Hamad al-Thani, stated his belief in unity as the only way forward when he proclaimed in-dependence in September, 1971, as Britain prepared to withdraw from the Gulf. He affirmed "our firm belief that our unity

in this region is a fateful necessity dictated by our higher common interest and demanded by those deep-rooted bonds that hold us together." That formed the basis of a political strategy patiently followed by the Qatar gov-

the international media as attention was focused on the West's scramble for petroleum in the U.A.E., Kiswait and Saudi Arabia. Qatar pressed quietly and cautiously ahead with a long-term strategy for industrialization and social reconstruction. Indeed, many observers felt that Qatar, through excessive cau-tion, was missing the tide of development that was flooding the Gulf.

was looding the Gulf. - But Qatar was able to progress at its own pace with its self-imposed priorities, and more importantly was ideally placed to foster the concept of Gulf cooperation. Being small in terms of wealth and political influence, Qatar could not be accused, as others had been, of trying to dominate the region. That is not to say that Qatar's interest in Gulf cooperation is purely altruistic. Regional unity

operation is pinery and usite. Regional unity is vital to Qatar's survival. The logic behind Qatar's regional policy is straightforward. The Gulf is a bomogenous region tied by a common language, culture, religion and even genealogy. Thus, the basis for common interest exists. But as each state developes in comparise infractorizer there is develops its economic infrastructure, there is a clear risk that duplication of output and overproduction on a regional basis could involve neighboring states in a commercial war and consequent political troubles.

Exporting Unit

eration is now a practical reality, with joint projects and participation agreements being

signed by the six Gulf states almost daily, While Qatar's political strategy had been centered mainly on the need for regional strength as a basis for all other action, it bas not ignored wider problems. As the state has grown in stature regionally, so has its importance in international affairs, and the capital of Doha has recently appeared on the itinerary of virtually every major political visitor to the lower Gulf.

Alliances

Qatar's foreign policy is operated in alli-ance with common-interest groups — the Or-ganization of Petroleum Exporting Countries, the Arab League, the Islamic Conference Organization and the nonaligned movement. In addition, Qatar has shown itself keen to pro-mote bilateral relations, particularly with other small developing states

Within the Arab world, Qatar endorses the view put forward at the Arab summit meeting in Amman last year that inter-Arab disputes will not be solved as long as there is a great disparity between the rich and the poor. Qatar is a willing contributor to the fund for the Arab Development Decade — a plan for promoting development in Sudan, Syria and is with vasi sencultural potential This kind of aid is particularly favored, as it involves investing revenue to acquire access to desperately needed food resources, without the risk of political embargoes such as the one that was until recently imposed on Iran.

the African continent through the numerous aid funds specializing in that part of the world. It is not merely a question of quid pro quo, with a political commitment to the Arab cause posed as the price of aid. There is a firm and stated desire to see a new economic order established in which economic cooperation is based not on a profit motive but on the mutual interest of rich and poor.

Islamic Concept

This concept is fundamental to Islam, the faith that dominates life in Qatar. Under the tenets of Islamic law, the charging of interest on loans is forbidden. The increasing awareness in the Arab and Islamic worlds of the extent to which the development of the Third, World bas been delayed by interest repayments has reinforced the desire to return to Islamic principles in international dealings. Thus, joint investment projects and long-term grants with at most a token interest rate are lavored.

From a Western viewpoint. Qatar's politi-cal philosophy may appear naive. Indeed, it is easy to point to attempts at cooperation with-in the Arab world that have proved disastrous. But there are a number of sound reasons why the latest moves should not be dismissed.

unique situation. Never before has a region

risen so quickly from underdevelopment to a

position of international economic impor-

lance and dominance, while at the same time

remaining dependent on the outside world for

Natural Gas **Future Key** To Economy

A SQATAR'S OIL wells begin to reach ma-turity, natural gas is the key to the nation's economic future, and the complex that is the cornerstone of this shift began production this year.

U.S. consultants who attended a recent energy symposium in Doha organized by the U.S. Department of Energy were optimistic about Qatar's economic future. G.A. Speir and J.R. Weyler told Qatar's oil industry leaders that their vast reserves of gas

could support liquid natural gas projects of gas t least \$500 million a year. The two consultants, from Roy M. Huffing-ton Inc., which has established liquid natural

gas projects in Indonesia, estimated the poten-tial earning period of Qatar's Northwest Dome gas field — which is "non-associated." that is, not associated with petroleum — at between 120 and 500 years. The field, one of the largest reservoirs of gas discovered in the world, holds an estimated 300 trillion cubic feet and possi-

bly much more. On Feb. 23. Sheikh Khalifa bin Hamad al-

ernment during the last decade, and that is now bearing fruit.

The state of Qatar has been ideally placed as the main promoter and supporter of the concept of Gulf cooperation. Situated at the heart of the Gulf, Qatar has a small popula-tion and a modest oil output of 500,000 barrels a day.

During the heady days of economic boom in the Gulf in the mid-1970s, this conservative Islamic country was largely ignored by

The alternative is easier. If the states of the region cooperate in planning their economic advance, they form a formidable exporting unit capable of competing on the internation-al markets. More importantly, in a region lacking foodstuffs and raw materials, they form a powerful importing cooperative able through the strength of demand to resist world inflation.

Through joint economic interest, the politi-

towers. Below, clock on the city's main square.

At the same time, Qatar, along with the other Gulf states, will be helping to create future markets for its own products by developing the economic base of the Arab world.

Much the same strategy applies to aid for

Qataris Look to Both Past, **Future in Cultural Growth**

EVERY NATION NEEDS roots, and none L more than a nation experiencing develop-ment at a frightening pace, a process that involves importing technology and ideas from the West.

Although young Qataris enjoy their visits to London and Paris, fast cars and Western pop music, they are for the most part more comfortable in Qatar with their own culture and entertainment

National Theater

Any occasion worthy of celebration brings crowds of Qataris, young and old, to a bare tract of land alongside the National Museum, one of Doha's best-known landmarks. From sundown until late in the night, singers and poets entertain with songs of life at sea in the pearl-fishing boats or stories of desert life, and spectators join sword dances and dabkas.

The songs and dances are banded down from parent to child, but with the pressure of modern living and the influence of television and hi-fi, the ability of the young to memorize vast repertoires of song and poetry is decreasing fast. Last year, the Institute of Music was estab-

lished under the direction of musician Ab-dulhamid Naameb. The institute will teach both Western and Arabic music theory, but will also try to ensure that young people learn to play traditional instruments like the quant

Young Artists

Mr. Awad has had to start from the beginning, working with children to teach them how to move, bow to use their voices, all the preliminaries for an approach to the stage. He says that the rigidity of the Arabic educational system does not allow the children to learn selfexpression, vital to acting.

young Qataris, who were willing to spend six nights a week in rehearsals learning from this genial director. He believes that he has found a few talented children who within a number of years could form the basis of a real theater troupe.

The fine arts movement is also very young. for it has no place in tradition. Islamic inscriptions and ornamental carvings are seen every-where, but artistic representation of real life has had no place.

Every summer, however, three young artists wbo have received training in fine arts insti-tutes in the Arab world and Britain set up their canvases at their own expense on street corners or public places throughout the nation to try to show people what art is. In one experiment. they set up their easels in a small fishing viltage and began to paint the scene before them. Soon a crowd of children had gathered, and eventually most of the residents came to see how their village appeared on the canvases. Their initiative is simple but important; unforjunately, it has received little attention from the government.

Where archaeology is concerned, bowever, the government has shown great interest in dis-covering the past of this desert peninsula. During the last four years, a French archaeological mission has spent a few months each winter exploring sites in the north of the country in search of evidence of past civilizations. Because of the short period spent on excava-

tion, the progress is slow. The most important find to date is a skeleton estimated to date from around 5,000 B.C. Evidence of a buried town on the northeast coast has also been discovered. This will require further study because no mention of a town in that location has been discovered in literary or historical sources.

The government is concerved not only with the distant past. With development rapidly removing many traces of the recent past, all traditional artifacts are worthy of interest and find a place in the museum. Recently, a girl in Al Khawr, Qatar's sec-

ond-largest town, stumbled across a cache of silver rupee coins while playing in a pile of sand. Local people rushed to seize souvenirs of the 100-year-old "treasure," and the government department of antiquities was hardpressed to persuade them to surrender their booty to the museum.

There are many plans to record what re-mains of Qatar's traditional architecture and other forms of heritage before they are lost under the pressure of development and the rarages of the harsh climate.

The Qataris on the whole are not nostalgic people. The old times were bard, dangerous and often hungry, and no one wants to face such bardship again. But neither do they want to forget, and they want to be sure that their children know their roots.

-KEN WHITTINGHAM

Thani, accompanied by Andre Giraud, then the French industry minister, inaugurated the enormous petrochemical complex and natural gas liquids (NGL) plants at Umm Sai'd. The two complexes, which together have cost about \$1.3 hillion, are the first of their kind in the Gulf.

Through the NGL plants, the waste of flared-off gas — which was running at the rate of nearly 1,000 cubic feet per barrel — has ended. Qatar used to flare off about 68 percent of associated gas from onshore fields; this has been reduced to 5 percent or less, which must be flared for technical reasons. In the offshore fields, 30 percent is flared but this soon will be eliminated.

Plant Rebuilt

The NGL's 1 and 2 plants went on stream earlier last year, NGL-1 having been rebuilt following a fire that destroyed it in 1977 (the causes are under investigation and litigation). The NGL plants supply much of the raw material for Qatar's industries, such as steel and fertilizers, and for power generating stations. Propane, methane and butane are exported

to Japan while enriched ethane gas provides the feedstock for Qatar Petrochemicals Co. When the feed is at full capacity, the petrochemicals plant will produce 280,000 metric tons a year of ethylene, 140,000 tons of low-density polyethylene and 46,000 tons of solid sulfur. An expansion is being planned for the production of high-density polyethylene. This complex marks the completion of Qatar's industrialization plan begun in the mid.1965 tons before any of the other lower

mid-1960s, tong before any of the other lower Gulf states had thought so far ahead. Vast sums of money have been spent on creating the industrial complex at Umm Sai'd, and the program has had its critics. There are those who criticize the record production achieved at the QASCO steel factory, managed by Kobe Steel of Japan: In such harsh conditions, what effect does working above capacity have on the life of the plant?

Questions were also being raised by some observers on the future of the petrochemicals plant, even before it went on stream. Saudi Arabia is building a much larger complex in Al Jubayl, and a total of 11 projects are planned for the Gulf region within the next decade. Do the markets exist?

Foresight Again, Qatar must be credited with foresight. The expensive perrochemicals project was established in parmership with CDF Chimie of France. That firm holds a 16-percent share in the QAPCO plant, while Qatar is a 40-percent shareholder in the COPENOR plant in Dunkerque. There is a close link between the two plants, and Qatar has trained its manpower and learned marketing techniques from the association with the French.

A further important safeguard was achieved last month when Saudi Industry Minister Ghazi Ghossaibi visited Qatar to sign an agreement on cooperation in the petrochemical and steel industries.

In both of these areas of production, Saudi Arahia can far outdo its smaller neighbor. The agreements cover training, importation of raw materials and coordination of marketing strategy, thus ensuring that Qatar will be allowed its position in the regional market and that it will benefit from Saudi Arahia's greater purchasing power when importing raw materials for the steel industry.

While heavy industry presses ahead, no deci-(Continued on Page 8S)

Doha Grows Like Flower In the Desert ON THE WESTERN extremity of the bay of Doba stands a white, pyramid-shaped building. The Sheraton Hotel and conference

center stands guard over one of the most re-markable development projects in the Gulf as the New District of Doha, popularly known as the West Bay project, springs out of the sandy ground

It is all the more remarkable for the fact that

In the last three months the municipal authorities in Doha have taken great strides toward improving the appearance of the capital. New buildings line the seafront, roads are being improved and trees are being planted.

seven years ago there was no ground on which to build. The sweep of Doha's coastline simply ended in salt marshes interrupted by the occasional reef or rocky outcrop. After seven years of dredging at a cost of about \$87 million, the bay has been completed, with 740 hectares of reclaimed land. This provides the site for Doha's model town development, the frame-work for urban renewal in the 1980s.

The new residential area is designed to be an integral part of the city, linked to the arterial road system even before the houses, shops and offices are built. The New District of Doha will accommodate about 60,000 people in high-standard housing grouped around community centers containing shops, mosques and social facilities. For the first time in Qatar, every element of the project has been subject to the most rigorous government control.

The consultant who conceived the plan, William F. Perreira, tried to combine the best in U.S. municipal planning with the social requirements of a traditional Islamic society. Thus, maximum privacy is ensured for each housing unit, and the Friday mosque holds a central position.

ally reserved area overlooking the bay. The Japanese and Kuwaiti embassies are already on their new sites. Government offices will also move into the district. The Qatar General Petroleum Corp., which controls the oil industry and its subsidiaries, will soon move into its new tower block offices.

Commercial ventures are also showing greater interest as the building begins. The Salaam Studios complex — including department store, gallery and restaurants - will open later this year.

The housing will mostly be offered to Qatari civil servants on extremely favorable government loans. This has raised some questions. Will the older parts of the city become like the (Continued on Page 9S)

Cornerstone Of Unity in **Gulf Region**

(Continued from Page 7S)

that can provide them with their basic oceds. Clearly, the Gulf oil producers have a long-term interest in the recovery of the Western economy, since the West provides technology. At the same time, the Gulf states must ensure their future food cumply the western the dealer their future food supply through the develop-ment of new agricultural exporting regions.

New Markets

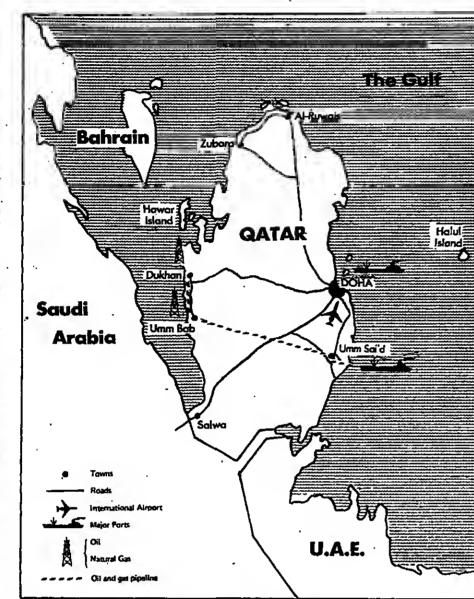

Additionally, the Gulf states that have be-gun to industrialize cannot hope to compete equally with Japanese or Western manufacturers for markets, so they must develop new markets, which means assisting the develop-ment of Third World countries. Thus, the survival of the Gulf states after the supply of petroleum dwindles depends on the growth, not the exploitation, of others.

A major factor at present continues to threaten the stability of the Gulf: the question of Palestine. When Qatar and its Arab neighbors cootinually emphasize the oced for a just international settlement of the issue,

they are not mouthing political platitudes. Qatar believes that the rights of the Pales-tinians are ignored by the West despite constant UN resolutions oo the subject. The muted anger, or rather deep sadness, is direct-ed specifically at successive U.S. administra-oons, for, rightly or wrongly, the Arabs perceive a radical and positive change in European attitudes to the Arab-Israeli conflict.

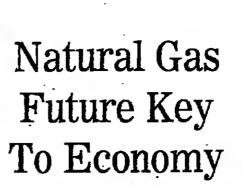

The Arabs are also fearful of the consequences of an endless struggle. The lack of a settlement costs them dearly in ecocomic de-velopment. Money that should be spent on growing food is spent on arms. The Palestini-an people are among the most educated in the area, and much of their energy and talent is dissipated because of the political situation. Moreover, the continuing struggle imposes political divisions oo the Arab world. The Gulf states want to - and must

1.

work with the United States oo a husiness basis. They say that they would like friend-ship to be the basis, but this is difficult as

loog as the United States supports Israel, which they see as the main obstacle to peace and prosperity in the Middle East.

OATAR

(Cootinued from Page 7S)

sion has been made on developing the enor-mous gas field. It is thought likely, however, that tenders for constructing a liquid natural gas plant at Ras Laffan - the nearest onshore point to the Northwest Dome field - could go out in September.

The plant would cost an estimated 54 bil-lion, and Qatar General Petroleum Corp., the lion, and Qatar General Petroleum Corp., the state holding company for the oil and gas in-dustry, has been negotiating with British Pe-troleum. Wiotersball, Mobil, Royal Dutch/Shell and CFP-Total, probably looking for an 80-20 percent partnership. One reason for the lack of urgency in developing the field is the great disparity between the current cost of oil and gas. So low is the price of gas, said Ali M. Jaidah, managing director of Qatar General Petroleum, that little effort is being medie to develop it made to develop it.

With most of the heavy industrial projects oow oo stream, there are signs of a relaxation in the general economic climate, with the possibility of more government funds being fed into the marketplace through local contracts. For the last two years, the government has im-posed a high level of financial restraint to hold down inflation, and the result was seen in un-finished buildings and a slowdown in the turn-over of luxiry goods.

Relaxation

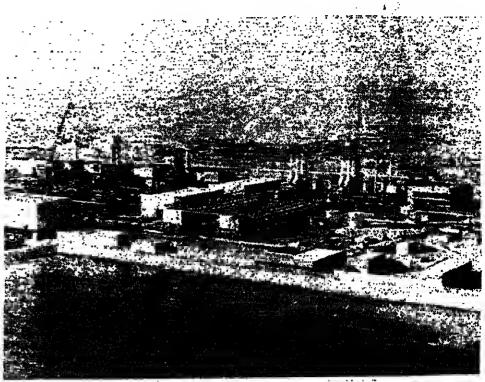

Local businessmen say that the number of contracts heing awarded for improvements to the environment and social development ensure that more cash will be available within the domestic economy rather than going abroad.

The government's current concern is in persuade local traders and husinessmen to do their part for the economy to complement the government's heavy industry. What is required is small manufacturing umits producing light industrial goods. A coordination committee, the Gulf Organization for Industrial Consult-ing, advises businessmen to set up projects for which a new market exists rather than in duplicate plants elsewhere in the Gulf.

The Qatar government earlier this year an-oounced soft loans to cover up to 40 percent of project costs, and relatively long repayment periods. The offer brought 15 plans or projects from citizens, ranging from paints, tiles, lamps, hatteries and water pumps to tissue paper and consumer goods.

Industrial Base

The director of Qatar's Chamber of Com-merce, Kamal Ali Saleh, has long believed that the future for Qatar lies in industry rather than trade, hut he says that it will take up to 10 years for a wide-ranging industrial base to develop, although he bopes to see at least 10 fac-tories operating by the end of this year.

An electricity generating station at Ras Abu Fontas. The complex also includes a water desalinization plant.

Unlike larger projects where joint ventures are the norm, the government is encouraging full Qatari ownership. Moreover, it is pushing businessmen to keep their projects at a small feasible scale. The theory behind this is clear. There is domestic demand for light manufactured goods, particularly household items, and the successful entrepreneur can, with govern-ment assistance, make a handsome profit in competition with expensive imported products.

Qahtan R. Masri, assistant general manager of the Qatar National Bank, has frequently inld businessmen that indigenous light industries would yield a better return on investment than unstable currency markets. It is a view endorsed by many foreign bankers in Qatar. And the case has been proved by a number of light industries set up in recent years in the United Arab Emirates.

Employment for Youths

But the importance of these industries is not only in keeping national capital working with in the company. It is also that they will pro-vide a source of employment for Qatari youth, but will oot require large work forces oecessi-tating the importation of labor from elsewhere. Qatar, like the rest of the Gulf, wishes to re-duce its dependence on foreign labor, particu-larly as the page of construction slows and the need for unskilled labor declines.

The transioon from the mentality of a trader to that of a manufacturing entrepreneur will obviously take time, and for the moment at least, most Qataris operating in the private sec-tor rely heavily on commercial activities, where despite the rising cost of imported manufac-tured goods there appears to be oo slowdown. The figures issued by the Qatar National Navigation and Transport Co. for 1980 show that imports of automobiles rose by 48 percent

while manufactured goods rose by 44 percent. Although Europe still holds the edge in the supply of manufactured goods, Japan beads the list of automobile imports with 122,000 tons.

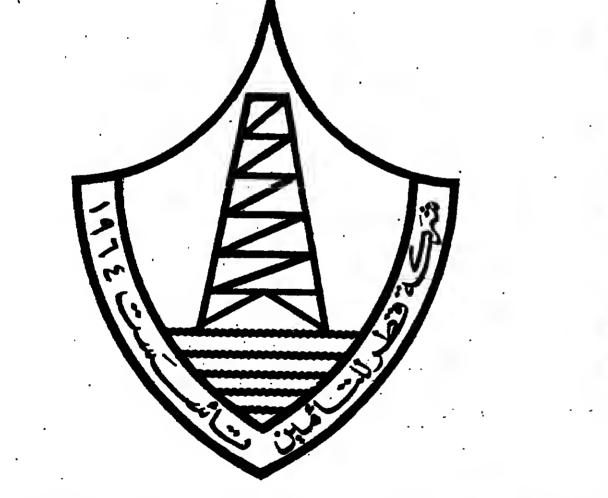

2 Major Factors

Two major factors are bound to have a posi-tive effect on domestic trade within the oext few months. As senior civil servants begin to new monus. As senior tavi servants occal to move into the oew housing complexes in the New District of Doha (West Bay), the demand for high quality furnishings and household goods will rise again. Moreover, as Doha develops into a leading

government-to-government conference center in the Golf region, the influx of large oumbers of delegates will produce an impact in the marketplace. The general report from hotel managers in Doha is that occupancy both from conference delegates and visiting busi-nessmen is substantially higher than last year, with a considerable increase in the latter Cate with a considerable increase in the latter category of visitors from France and the Far East.

The government, as the sole major source of national revenue, can readily cootrol the mon-ey supply through payments on contracts, and any uplift in the economy will be watched most carefully. The government does oot wish to see a spiral of inflation pushing rents and food prices beyood the means of the average citizen. Although rents are high io Doba -\$1,500 a month is not unusual for a mediumsize apartment - there has been oo significant increase in the last 12 mooths, and government

subsidies have kept food prices down. If the brake is being eased off the economy, it will be up to local businessmen to show that they are willing to invest at bome and fulfill the government's industrial plans, rather than export their capital to make quick returns elsewhere.

Facilities for Sports Are Being Improved

SPORTS ARE TAKEN very se-group behind Saudi Arabia and Iraq. But as consolation their top striker, Mansour Multah, was de-clared "player of the tournament." acilitics.

A new \$5-million indoor stadium will soon be handed over to Qatar's National Olympic Com-mittee. The air-conditioned stadium, built by Societe Bermaho of France, will be used for a wide range of sports, from basketball to ymnastics. It is adjacent to the 60.000-seat Khalifa soccer stadium, where most top-class matches

In addition, work has begun on construction of a sports complex for al-Ahli club of Doha, the first

The importance of sports is evident in the interest taken by members of the ruling family.

of seven complexes to be provided for the country's major league clubs. The contract for about \$4 million has gone to a local company, Darwish Engineering, and each complex will include an artificialturf soccer field, a swimming pool and indoor facilities.

The importance of sports in Qatar is evident in the personal interest taken by leading members of the ruling family. The Supreme Sports Council is headed by the heir apparent, Sheikh Hamad bin Khalifa al-Thani, while the National Olympic Committee is headed hy the emir's third son, Sheikh Abdullah.

Major Passion

Soccer is the major passion, as it is throughout the Arab world. Considering that there is only one grass field in Doha, the Qataris have achieved considerable success in the last couple of years.

Their youth team recently won entry to the final stages of the forthcoming World Youth Cup to be held in Australia, while the senior national squad performed well in the Asia Group II qualifying rounds of the World Cup. Needing a 1-0 victory over Saudi Arabla in the final match of the round-robin tournament, they lost by a single goal and finished third in the

÷

.

Much of the credit for the success in international competition must go to the coaches and mana-gers. At club level, former British professional Jimmy Meadows, manager of the al-Sadd soccer club, has produced a championship side consistently during the last three seasons. At the national level, former Brazilian internationand Barcelona player Evaristo Macedo had achieved a magic un-

derstanding with the temperamental players where previous English managers had failed. So highly rated is Mr. Macedo that a Saudi club from Riyadh re-portedly offered him \$17,000 a month plus a large villa and car to leave Qatar and join the club. But Mr. Macedo seems to have ignored the offer and intends to continue

Successful Sportsman

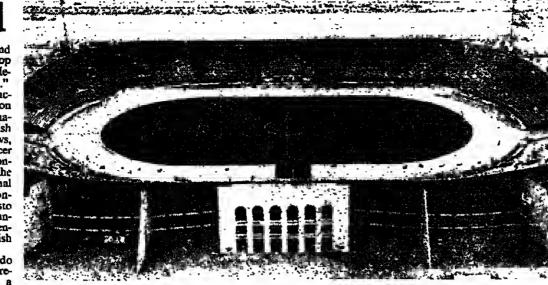

with his two-year contract.

While soccer achieves the headlines, Qatar's most successful sportsman is Saad Miflakh, a member of the armed forces and an extremely competent cross-country and middle distance runner. During the last two seasons, he has won numerous medals in competitions in the Gulf and the Arab world. He did not have a chance to test himself in international class running at the Moscow Olympics, bowever, because Qatar boycotted them over the Soviet intervention in Afghanistan.

One of the latest sports to win government recognition in Qatar is bowling. Qatar is now a full mem-ber of the international federation and takes part in the world championships. Because the first bowling center in Qatar was only introduced a few years ago, the stand-ards are not yet high, but a new six-lane facility will open at the Sheraton Hotel, allowing for more ractice

One of the biggest problems for sports administrators in Qatar is how to motivate the young men to train to the level required for international standards. There are no professional sports --- administrators believe this is not feasible until there is a real improvement in standards and in the availability of talented players.

The inducements that encourage young players elsewhere - the prospect of fame or international travel - do not really apply. Most

Medical Services Get a Boost

ØATAR

QATAR, WHICH HAS a free national health service but has often had to fly patients out for specialized treatment, has been moving to improve its medical facilities and to attract top quality medical personnel.

A kidney dialysis unit is the latest addition to its specialized ser-vices, and this means that a number of Qatari patients who have been obliged to reside in England can now return to their families.

While developing its medical services, Qatar has been willing to fly patients at government cost for treatment in major Western medical centers. But naturally, because of costs, the disruption of families and the resulting emotional com-plications, the Ministry of Health has done its utmost to bring top quality medical facilities to Oatar Later this year, when the 600-bed Hamad hospital comes into ser-vice, there will be adequate provision for treating all but the most unusual cases.

The new hospital, which has cost about \$55 million, incorpo-rates seven large and four small operating theaters, a large out-pa-tient and accident unit as well as specialized departments for children; ear, nose and throat discases; heart treatment, hurns and psychological disorders. The hospital will be the fifth in Doha. There are also hospitals in the main towns of Al Khawr and Medinat al-Shemal.

While the hospitals form the core of the medical services, a great deal of attention has been paid to the development of preventive medecine and health educa-tion, especially as the reconstruction of urban areas has gradually reduced health hazards in the city.

Network of Clinics

An expanding network of clinics throughout the country provides the framework for primary bealth care, and a nationwide campaign to vaccinate children against major diseases such as polio and diphtheria gave health workers the opportunity to contact mothers and explain the need for careful hygiene to prevent illness. The vaccination campaign was extremely successful, and the incidence of endemic disease in Qatar is very low. Children also receive health educa-tion in school, following the phi-losophy that children are the best

medium for instructing parents. No less important than direct medical services is the constant inspection and control of standards of imported foodstuffs. The recent demolition of the old fruit and veg-

desert, inevitably faces. The use of etable market situated close to Doba port in the heart of the comsophisticated poisons and other mercial district has improved sanidevices in the sewage systems and tation and health standards. In the other potential breeding grounds new marketplace situated outside should bring the problem rapidly the town, the facilities have alunder control. An encouraging sign of public acceptance of the importance of lowed proper refuse collection and

cleaning while maintaining the health care has been the enthusias-tic, support for Qatar's recently open character of the traditional Arah food market, The major target at present is the eradication of the rat problem formed branch of the Red Cres-

CATAR

Media Play Big Role In a Small Market

concentrated in the capital of Doha, Qatar is remarkably wellserved by media.

Television broadcasting began in Qatar slightly more than 10 years ago, with color transmission since 1975. The station, which carries a limited amount of advertising, has 75 hours of programs a week; more than half are locally produced. A significant number of programs in English and Hindi cater to the expatriate audience.

In a major expansion, a second channel is shortly to be introduced that will be devoted during the afternoon to educational and cultural programs, and in the evenings to foreign-language programs. Two new studios are being prepared, one for the production of drama programs and the other for the use of the second channel.

The quality of locally produced Arabic programs has greatly in-creased in recent years, and is as-sisted by the fact that the Gulf Radio and Television Training Center is based in Doha. The most marked improvement has been in documentary films, where a new, open attitude toward informing the people has allowed television teams to go out in the streets to record Qatar's daily life. A recent program offered a rare opportuni-ty to spend a day with one of the dwindling band of Bedouins who inhabit the border areas between Qatar and Saudi Arabia.

Radio Expansion

Radio is also in a phase of expansion with new, more powerful transmitters being installed so that

FOR A SMALL country with a Qatar radio can be received clearly in the Arab world as a whole. The introduction of computerized equipment has led to 24-hour broadcasting on the English-lan-gnage channel with music through the night. That channel, QBS, one of the most popular in the Gulf, recently introduced a local phonein program.

Qatar has two daily Arabic newspapers, al-Arab and the newcomer Arrayah, both privately owned, while the English-speaking owned, while the English-speaking community is served by the Gulf Times, which began life as a week-by but has been produced daily since the end of February. There are more than 20 weekly and monthly magazines, mostly in Arabic, on a variety of subjects; underthet in our of the most pro-

undoubtedly one of the most popnlar papers among young Qataris is a weekly sports paper, al-Dauri. The most prestigious production in the field of publishing is the Ministry of Information's monthly cul-tural magazine al-Doha, which has a reputation throughout the Arabic-speaking world as a leader in its field

The rapid growth of the media in recent years is evidence of a major change in the government's at-titude toward information. In the not too-distant past, there was a general distrust of journalism engendered by often misinformed reporting in the Western press, and particularly the reporting of Organization of Petroleum Exporting Countries affairs. But there has been a gradual realization that the best way to counter bad reporting is to provide accurate information. The change also reflects a growing national self-confidence as the major development projects of the last decade have taken root.

Business Attitude

No less important than the gov-ernment's attitude toward censorship is the attitude of local businessmen toward advertising, which supports many of the publications. The growth of the press, in addi-tion to the establishment of a number of advertising agencies, points to an increasing awareness of sophisticated advertising techniques

that were not necessary until the great expansion of the consumer market in Qatar. Outside the scope of commercial publishing, the Ministry of Infor-mation has a wide range of publications covering many aspects of Qatar past and present, and is attempting to ensure that every phase of this period of rapid change is recorded in words and

BUSINESS/FINANCE

BUSINESS NEWS BRIEFS U.S. Banks

To Meet on Sony Expects Sales to Increase 18% This Year Resters

-statester-

ę., e

 $\left(1 + 1 \right)$

TOKYO --- Sony expects sales to rise about 18 percent during this business year over the \$4.23 billion last year, managing director Kimio Okura said, noting that net income could be the same or a little lower than last year's \$325.3 million.

Mr. Okura said that Sony benefitted greatly from cheaper yen while appreciation of the Japanese currency this year is likely to cut into prof-its. During the current business year which ends in October, Sony expects capital investment to reach about \$350 million.

He also said that the company will have to start manufacturing video tape recorders overseas, and noted that demand has oustripped supply of such items as VTRs, color televisions and Walkman cassette players. The company is planning to build a factory to make color TVs and VTRs in the easern United States, although a specific site has not been picked. (See Company Reports.)

Krupp Expects Losses in Steel, Shipbuilding Resters

ESSEN. West Germany — The Krupp industrial group's steel and shipbuilding operations will report losses this year while the outlook for other sectors is unclear, managing board chairman Wilhelm Scheider said Tuesday. He declined to forecast 1981 results.

Incoming orders in the shiphuilding sector dropped to 150 million Deutsche marks in the first five months of 1981 against 200 million DM a year ago, while sales rose 62 percent in the same period. Even with the upturn, the shipping sector still needs government subsidies to remain competitive, Mr. Scheider said, adding that incoming orders for steel dropped to 2.6 billion DM from 2.9 billion while sales declined 7 per-

Overall group sales rose slightly to 5.2 billion DM in the first five months of 1981, but growth varied. The group plans fixed asset invest-ments this year of 485 million DM and will spend 240 million on research and development, Mr. Scheider said. (See Company Reports.)

American Express Looks to Sell Banking Unit

NEW YORK — American Express Corp. said Tuesday that it has held preliminary talks on the possible sale of all or part of its wholly-owned subsidiary, American Express International Banking Corp. The disclosure was contained in proxy materials filed for a special

shareholders meeting due June 29 to approve the acquisition of Shearson Loch Rhoades by American Express. The company did not disclose the third parties with whom it has held talks and said "no agreements of any kind have been reached."

American Express noted that the banking unit — which operates in 34 countries and has assets of approximately \$6.9 billion — is not a member of the Federal Reserve System and does not engage to domestic U.S. business except as is necessary for its activities outside the United States. Analysts said the most likely buyer of the unit would be a foreign hank.

Corporate Operating Profits Decline in Japan Reuters

TOKYO --- The operating profit of major Japanese companies in the first quarter of 1981 fell an average 5.5 percent from a year earlier after a 3.1-percent year-on-year rise in the preceding quarter, the Finance Ministry said to a quarterly survey report.

This is the first fall of the index since the last quarter of 1977, when it fell an average 3.2 percent, The index is based on a survey of 18,463 companies, but excludes banks and insurance firms.

B.C. Hydro Requires Loans of \$18.2 Billion Reaters

VANCOUVER - British Columbia Hydro said it will have to borrow \$18.2 billion to keep afloat over the next 10 years, \$5 billion more than it had earlier estimated.

The government-owned corporation estimated expenditures over the next decade at \$22.6 billion, with about \$6.5 billion provided from operations; however, \$2.1 billion will be used to retire existing debt, leaving a shortfall of \$18.2 billion.

Polish Debt 60 Creditors Ponder **Delay in Repayments**

Reuters NEW YORK - About 60 U.S. banks with loans outstanding in Poland will meet here Friday to discuss a proposal to delay agree-ment on rescheduling Polish deht for six months, informed banking sources reported.

Some major U.S. banks believe that European and Japanese institutions are moving too fast to-wards a rescheduling agreement without a clear idea of the outlook for Poland's economy, the sources Banks will meet in New York,

not in Chicago as had earlier been planned, to work out a coordinated stance for the next meeting of the international task force of creditor banks due to be held in Paris June 24. The 19-member task force,

which represents 460 creditor banks, drew op a draft reschedul-ing agreement for the \$2.37 billion of Polish debt falling due in banks this year.

Frankfurt banking sources have said that the proposed terms of the agreement would require interest payments to begin immediately at 1% percentage points over the London interbank offered rates with the principal amount in be rescheduled over seven years,

Those terms were considered too lenicat, U.S. banking sources said. "We're oot convinced that we have the basis for a seven-year rescheduling," one source said. "No one bas a really good grasp of what their economic outlook is," the source added, noting renewed uncertainty about Poland's politi-

cal future. Accordingly, major U.S. banks on Friday will put to their col-

leagues a proposal for a six-mooth suspension of a deht-rescheduling agreement, until the end of 1981 the sources said. During that periallow principal payments to be de-layed, they said.

April, was off 8.66 to close at 1,003.33. Proponents of such a plan, which would be similar to that used with countries such as Bolivia, believe the six-month holdup would allow time to set up mechawind anow this to set up incenta-nisms to monitor Polish economic progress. If U.S. banks agree to back such a delay, the proposal will be put to the Paris meeting. The sources said U.S. banks would-find it difficult to accept the draft accord drawn up hy the task force, and have worked against it to task

and have voted against it io task force meetings. If the task force

U.S. Inflation Spiral Easing

By Kenneth H. Bacon AP-Dow Jones

WASHINGTON — After two years of double-digit inflation, a sustained period of moderating prices in the United States is being predicted hy

many ecoomists. "The inflation outlook really has improved" over the past few mooths, said Otto Eckstein, presideot of Data Resources. "It's a substantial change in most economic forecasts."

Michael Evans, president of Evans Economics, another forecasting firm, said that "the rate of inflation for at least the next year and a half is likely to be quite a bit lower than generally expected." Not all analysis share the bright outlook. Henry

Kaufman, the Salomon Brothers economist influential oo Wall Street, believes that the administration's "exceedingly expansionary" policy of large tax cuts and higher defense spending will make it difficult in cool inflation.

Some forecasters, bowever, see the inflation rate, as measured by the consumer price index, falling as low as 7½ percent next year. Although still high by historical standards, that would be a substantial improvement from the 13.5 percent rise last year.

Most of the new optimism reflects softer oil prices and slower increases in food and bousing prices than were anticipated several mooths ago. Analysts also see signs that the spiral of rising prices and catch-up wage increases may be slow-

ing. Moreover, both private and government ana-lysts see the likelhiood that productivity will grow this year and for at least the oext several years.

"What we're observing is a cyclical slowing of inflatioo pressures which typically occurs during the recovery phase of the business cycle - a period characterized by slack markets and cyclical efficiencies," said Aubrey Zaffuto, the economist for Schroeder Capital Management, a New York investment-counseling firm.

At the beginning of this year, Data Resources forecast a gradual deceleration of inflation, with consumer prices rising 11.5 percent this year, 10.2 percent oext year and 9.5 percent in 1983. But the firm's latest forecast is a 10 percent increase this year, followed by rates of 8.7 percent and 7.9 percent in the next two years.

From Agency Disparche.

Similarly, Morgan Guaranty Trust in January predicted inflation of 11.4 percent this year. The hank's June projection sees consumer prices climbing 9.7 percent this year and 7.5 percent tiext year.

The Reagan administration does not claim credit for the recent slowdown in inflation, because most of its policies have oot been enacted yet. But "we're paving the way for a major decline in inflation in 1982," said Lawrence Kudlow of the Office of Managemeot and Budget. He cited policies of budget restraint, tax-rate reductions, deregulation of business and pressure on the Federal Reserve to maintain a restrictive monetary policy.

Benefits Predicted

Economists say the current moderation in inflation should begin to produce economic beoefits.

"The gap between prime interest rates and the ongoing rate of inflatioo is now the widest in memory and far above the general historical experience of three percentage points or so," said Al-bert Cox, president of Merrill Lyncb Economics, 'Interest rates are bound to give and probably SOUD.

Mr. Zaffuto thinks that the slowing inflatioo rate should spur consumer spending, "Because wage increases are based on the previous year's inflatioo rate, real disposable income rises as in-

flation slows year in year," he said. Lower inflation, analysts say, sbould oarrow cost-of-living increases provided under union contracts and reduce catcb-up wage demands oext year, a hig bargaining year led by auto and ruhber workers.

"If we get six to nine mooths of single-digit inflation, business might get wage settlements down to 7 percent." from the 10 percent average last year, said Richard Nenneman, senior vice presideot of Philadelphia's Girard Bank.

Additionally, the strong dollar, largely a prod-uct of high U.S. interest rates, holds down U.S. inflation by reducing the cost of imports. "The strengthening of the dollar should knock 1.5 per-ceotage points off the inflation rate just this year," said Donald Raticzak, the director of ecooomic forecasting at Georgia State University. "That's coe of the reasons a lot of people are revising their (inflation) rates down."

NYSE Prices Drop Despite Cut in Prime conference here. Myer Rashish, undersecretary of state for eco-comic affairs, said that some coun-tries which criticize high U.S. in-

have been hopeful the past couple of weeks that interest rates would come down rapidly as a result of a steady decline to the natioo's mon-

The Fed reported May's gain

WASHINGTON - U.S. industrial production inched upward in

May, with most of the small gain due only to aum dealers building up inventories, the Federal Reserve Board reported Tuesday.

May's 0.3-percent rise in pro-duction followed April's down-ward revised 0.1 percent increase - tiny figures when compared with gains of 1 percent or more for five straight months at the close of last year as the economy recovered from recession.

In related oews, the Commerce Department reported that housing starts in Moy dropped 14 percent, after a revised 3.3-percent increase in April, to a seasonally adjusted annual rate of 1.15 million units, the lowest since a severe slump exactly a year ago. Issuance of building permits, an indicatioo of future housing construction, were at a virtual standstill, rising only 0.3 perceot to an adjusted annual rate of

1.18 million units. The starts in May were at the

U.S. Defends Fiscal Policy

By John Bartram Reuters

PARIS - The United States Tuesday night rejected European criticism that high U.S. interest rates and the strong dollar are seriously damaging economies and putting people out of work in Eo-

rope. After a sharp attack by France oo American policies at a 24-nation Organization for Economic Cooperation and Development on Transamerica's second quarter their commitment to anti-inflation policies.

May's production was 6.1 per-cent above the depressed level of a year carlier, but still slightly below "We are oot pursuing a policy of high toterest rates," he said. "But we think it's desirable for countries which face a serious problem of inthe pre-recessioo peak level of March 1979, the Fed reported. The flatioo to fight inflation. If coun-April gain was revised downward from the 0.4 percent originally retries have low inflation and high upemployment then they should combat that."

Declines led advances by about a 9 to 6 margin among the 1,943 issues traded on the New York exchange. The volume on the NYSE was 57.78 million shares, down from the 63.35 million shares traded Monday. Prices were lower to moderate trading of American Stock Ex-

change issues. Larry Wachtel of Bache Halsey Stuart Shields said traders were disappoioted that no major banks followed Chemical Bank's Mon-

TOKYO - China has informed Japan that it will continue to pay cash for machinery and equipment imports for two planned petro-chemical complexes, withdrawing a previous request for a deferredpayment formula from Japan, govcrament sources in Tokyo said.

Reviers

The notification, through diplo-matic channels, means China's Na-tional Technical Import Corp. will implement its original contracts with about 10 Japanese companies, which once seemed in danger of cancellation.

The Chinese agency last January told the Japanese companies it was suspending the construction of the complexes — in Nanking and Daqing — due to shortages of foreign exchange and energy re-sources, the sources said. But Chi-na decided to continue to import the machinery and equipment and asked for a deferred payment facil-ity of \$600 million for about five years to finance the imports.

Toyo Engineering Corp., head of the group of companies — which includes C. Itoh & Co., Mitsui Engineering & Shiphulding, and JGC Corp. — said the Chinese decision to continue to pay cash would settle most of the problems between the two sides. Only minor questions, such as a change in the original plan for training Chinese experts for the construction and operation of the complexes, re-main to be solved.

Details of Loan Request

Japanese companies are responsible only for exporting the machinery and equipment, with the actual construction of the complexes left to the Chinese, Toyo

The Japanese government is still awaiting detailed explanations about China's request for loans totailing \$2.6 billion to raise funds propose a five-year suspension of needed for the construction of the the contract.

A working-level mission of the Japanese government visited Pe-king last mouth to listen to the cheduling, the sources said. Chinese explanation of its loan request, but government sources said be very complex. t was not sufficient. The requested loans will be used mainly for pay-ing wages to Chinese workers and

other domestic costs of construction, they said. Also Tuesday, Nippon Steel said China has placed an additional steel order for 87,000 metric tons with six major Japanese steel manufactuers for July-September

shipment. The order was a supplement to 482,000 tons that China ordered earlier this month. Exports Declining

The new order brings the total amount of ordinary steel bought by China from the Japanese manufactures for shipment to the second half of the 1981 to 567,000 tons, Nippon Steel said. China, which buys Japanese steel on a semiannual basis, bought 910,000 tons in the first half of the year.

Japan's steel exports to China have been steadily falling in recent years and Japanese industry offi-cials fear that exports may fall below the 2-million ton level this year for the first time since 1973.

Meanwhile, the Mitsohishi Corp. said its industrial group ex-pects Liu Xhinghua, deputy gener-al manager of the Chinese corporation, to visit Japan soon to talk about the problem of compensation for the termination of its con-tract to build a steel rolling mill at

Baoshan, near Shanghai. Mitsubishi is seeking cash com-pensation of less than 50 billion yen (\$222.7 million) for the termi-nation of the 85-billion yen con-tract, it said. The Japan-China As-

sociation on Economy and Trade said last week that Mr. Liu will products as well as on coil would

rods.

Commission officials said Iodustry Commissioner Etienne Davignon would announce a decision on the possible extension of mandatory controls on the independents' products at a meeting of EEC industry ministers next week.

EEC Steel Firms Unable to Agree **On Output Cuts**

BRUSSELS --- The EEC's independent steelmakers have been un-able to agree on voluntary production cuts, their spokesman said

Tuesday. He said a month of negotiations between the independent steel-makers' association, which ac-counts for about 20 percent_of community production, and En-rofer, the EEC steelmakers association, had produced no agreement.

The EEC Commission, which has been directing the steel indus-try for nine mooths in an attempt to end a price war among compa-mes faced with shrinking markets, may now have to extend its system of mandatory production cuts to the main products of the inde-pendent producers, the spokesman said. These are merchant bars and reinforcing bars, widely used in the construction industry, and wire

The commission has already said it will prolong mandatory pro-duction cuts oo coils, widely used in the car industry, for another year after the end of June, although it is returning control over all other products to Eurofer. A commission decision to im-pose quotas on the independents'

mean that it retains control over more than 50 percent of EEC steel production.

originally expected. One reason wby other hanks did not follow Chemical's lead, ac-cording to Irwin L. Keliner, senior vice president and chief economist of Manufacturers Hanover Trust, was that the Fed appears willing to

allow short-term rates to remain high despite recent declines in M-1B, the primary measure of the na-tion's money supply. Tuesday the rate on federal funds, overnight money that banks

trade amoog themselves, was as high as 19% percent, up from the 17% to 18 percent range that pre-vailed last week. The Fed has a more direct impact through its

ca said Tuesday that its United Artists subsidiary had established an additional reserve of about \$29 million against its remaining investment in the movie "Heaven's Gate," which is expected to lose a great deal of money. Transamenca said United Art-,

ists will report a loss for the secood quarter, which may have an impact

slightly higher than overnight levof the OECD meeting, Mr. Cheysels, dealers said. Trading was active and nervous,

as a number of operators squared positions ahead of West German holidays Wedocsday and Thurs-

day. The dollar was quoted at 2.3430 Deutsche marks compared with morning highs above 2.35 DM and Mooday night's close of 2.3375 DM. In London the dollar closed at 2.3474 DM.

The dollar's initial firmness was a reaction to its sharp decline on Monday, which itself was based on expectations of a decline in U.S.

interest rates. Sterling, which opened at more than \$2, dropped back to \$1.9965, though it was still higher than Mooday's closing of \$1.9887. out inflation

son stepped up the Mitterrand government's receot criticism of U.S. economic strategy: "With in-terest rates at 20 percent and the dollar floating in the stratosphere, employment is falling, trade suffers, no industrial investments can take place and the worst off are in the forefront of the battle

against inflation." He said his government's priori-ty was employment, making the strong dollar and high U.S. interest rates intolerable. Mr. Rashish, who is also Mr.

Reagan's personal representative at major international economic meetings, said present policies were designed to restore economic growth in the United States with-

vestment» or visit us and see the world of diamonds. International Diamond Sales Head office : 50-52, Hovenlersstraat 2000 Antwerp, Belgium Tel, 031-31 77 64, Telex 35395 Indisa-b LONDON : Inn on the Park Hamilton Place - Park Lane London W1 - Tel. 01-409 1844

Since Rabobank seems to dat. be a mainly domestic bank, that needs some explanation: Rabobank is a co-operative banking organization with 3,100 offices in the Netherlands. Therefore on-the-spot services are available in every part of the country.

By providing 90% of all loans to the Dutch agricultural sector, Rabobank is the largest source of credit to the domestic green sector. And plays a key role in agribusiness finance. Of all Dutch exports 25% consist of agricultural products. The importance of agribusiness for Dutch foreign trade gives Rabobank an extensive and up-to-date knowledge of inter-national trade finance.

Une third of all Dutch companies conduct their financial business through Rabobank. More than 40% of all Dutch savings are entrusted to Rabobank.

With total assets of more than 97 billion Dutch guilders (approx. US \$ 46 billion).Rabobank ranks among the 25 largest banks in the world.

ę

Additional strength is derived from the membership in the Unico Banking Group, in operative banks. As a group these small detail, we'd like to meet banks have total assets of US you... and help.

ANCHORAGE - Next month, an armada of tugs and barges will leave Puget Sound for the two-and-a-half-week voyage north through the Gulf of Alaska, past the Aleutian chain, across the Ber-ing Sea, around Point Barrow and to the docks at Prudhoe Bay. Aboard will be multimillion-dol-

lar cargoes of oilfield equipment that will permit the extraction of as much oil as possible from the rich Alaskan fields.

The prime oil formation in Prudhoe Bay is the Sadlerochit, where production started in 1977 from sandstone that begins at 9,000 feet below the frozen mud on the surface. A secondary discovery, where production is expected to start eary next year, lies slightly above, at 1,500 feet, and to the west, in the Kuparuk formation. We will spend \$5 billion in the

next five years in North Slope de-velopment," said Glenn Simpson, president of Arco Alaska, Alantic Richfield's operating arm here. "This will include additional oil re-covery equipment in the Prudhoe Bay field as well as bringing the Kuparak field in to production ear-

the oil's flow.

United States.

Warns of Need for Tighter Regulations

Mr. Stone was chairman of the CFTC last year when Congress or-

dered that agency to head a mas-

sive silver study in conjunction with the Securities and Exchange Commission, Federal Reserve

Board and Treasury Department.

The multi-agency study came out two weeks ago and was promptly disavowed by the SEC,

which said its investigations, which are still under way, tended to con-flict with the CFTC-drafted ver-

Mr. Stone prefaced his own re-port by saying, "this is not a dis-sent," then offered \$1 pages of

contracts.

ly next year," he added. The original discovery is be-lieved to hold 30 billion barrels of oil, of which about 9 billion are said to be recoverable. The field is operated in two parts, half by Standard Oil of Ohio, which owns about 53 percent of the oil, and the other half by Atlantie Richfield, which owns about 21 percent. Exon also owns about 21 percent, with other companies owning minor shares

750 Million Barrels

The Kuparuk sands are believed to hold about 4 billion barrels of oil. Geologists for the state have estimated, however, that no more than 750 million barrels are reco-

By operating the Sadlerochit. field with present equipment and drilling in a 160-acre pattern, only 5.3 billion barrels would be recovbillion barrels.

THE BOOK OF EBENEZER LE PAGE By G.B. Edwards. Introduction by John Fowles. 400 pp. \$13.95. Knopf, 201 E. 52nd SL, New York 10022.

Reviewed by Doug Lang

I Conversation with a superb old man, a crusty, intelligent passionate -and individualistic character at the peak of his powers as a raconteur, and you will have a very good idea of the impact of "The Book of Ebenezer Le Page." The narrative thrust of this ex-traordinary novel depends much less on the conventional strategies of fiction than it does on the compelling nature of the voice of its narrator, Ebenezer himself, a man of the Channel Islands, whose life traverses the first three quarters of this century.

This is Ebenezer's story, from childhood to old age; from the time of the Boer War, in which Ebenezer's father dies, through World War I, in which Ebenezer's best friend, Jim Mahy, is killed, and World War II, during which Ebenezer's homeland, the iswhich Ebenezer's nomerand, the is-land of Guernsey, is occupied by Ger-man troops, to the days of the prolif-eration of television, which Ebenezer deplores, and mass tourism. It is Ebenezer's story and it is the story of Guernsey, which lies 30 miles west of the Normandy coast and is best proom for its cattle and its matter known for its cattle and its market gardening and, more recently, along with the island of Jersey, as a popular vacation resort.

Ebenezer Le Page is a Guernseyman first and foremost:

man first and foremost: "Guernsey, Guernesey, Garnsai, Sarnia; so they say, Well, I don't know, I'm sure. The older I get and the more I learn, the more I don't know nothing, me. I am the oldest on the island, I think. Liza Queripel from Bainters and bain children the I Pleinmont says she is older, but I reckon she is putting it on."

These are the novel's first five sentences and they give us a taste of what is to follow: the continuing emphasis on locale, the quirky, near hypnotic rhythms of Ebenezer's speech, and the high level of attitude that is present in all that Ebenezer tells us. It also gives us Liza Queripel, the woman with whom Ebenezer enjoys and suffers a lifelong on-again-off-again love affair that runs as much on conflict and contradiction as it does on attraction and devotion.

The story of Liza and Ebenczer is one of the very many threads stitched into the fabric of this novel; there is the story of Ebenezer's aunts, La Pris-sy and La Heity, who marry the Mar-tel brothers, Harold and Percy; and the story of Ebenezer's cousins, Horace and Raymond and of the lat-Horace and Raymond and of the lat-ter's marriage to Jim Mahy's cousin, Christine; there is the story of Jimy Mahy and his unhappy marriage to unctuous Phoebe and of Jim's death in the Great War; there is the story of Ebenezer's sister, Tabitha, and her marriage to the ill-fated Jean; and many other. But it is Ebenezer's many others. But it is Ebenezer's voice, more than the stories them-selves, that sustains our interest so thoroughly. Ebenezer's voice presides over all and its creation is a tremendous achievement. It allows the novel's form (prolonged reminiscence) to work perfectly; it amuses, it enter-

and this work is the most significant event of this kind in English fiction since Jean Rhys emerged from two decades of oblivion with "Wide Sar-gasso Sea" in the mid-1960s, when everyone who had known of her had aseryone who had known of her had as-sumed she was long since dead. Un-fortunately, we shall never know whether G.B. Edwards was simply the author of an eccentric masterpiece of autobiographical fiction or, potential-ly, at least, the possessor of a genius for creating fictional voice. "The Book of Ebengeer Le Page" was in-Book of Ebenezer Le Page" was intended to form the first part of a trilotended to form the first part of a thic-gy, the second and third parts were to be called "The Puppet: The Book of Philip the Amputated" and "The Grandmother of the Cemetery: The Book of John the Sluggard." If even a significant fragment of one of these had come into being, we would be better equipped to evaluate the full weight of Edward's impact. weight of Edward's impact.

weight of Edward's impact. It is a pity, too, that we shall never have the pleasure of reading the other two books. Actually, Fowles would be the perfect candidate to pick up the trilogy where Edwards left it. Fowles studied French at Oxford, so he would be capable or dealing with the patois peculiar to Guernsey that adds spice to so much of the narrative (there is a clossary of terms at the end (there is a glossary of terms at the end of the text). Fowles is familiar with: the use of an island as a general fic-tional metaphor: he used it himself in "The Magus." The relationships between men and women in Edwards' book are as complicated and as full of conflict as are the relationships be tween men and women in all of Fowles' novels. Fowles is experienced in the field of researched, historical fiction: he gave us "The French Lien-tenant's Woman." And Fowles' public persona has been as salty at times as Ebenezer Le Page's fictional one: 'I lived in Greece for a long time and lived in Greece for a long time and grew to hate it, that interminable sunshine," he stated (for example) in an interview in 1976. Fowles has a predilection for placing his characters in situations where their actions are very much determined by the force of history, too, and this is also a promi-nent factor in G.B. Edwards' work. This coincidence of literary dop-

This coincidence of literary con-cerns and tendencies makes John Fowles an appropriate heir to the Ed-wards legacy: Fowles could have writ-ten "The Book of Ebenezer Le Page" himself. If he isn't too busy revising one of his own earlier works, perhaps he could bring Philip the Amputated and John the Sluggard to life for us. It would make for a fascinating literary ploy on his part.

Doug Lang teaches writing at the Corcoran School of Art. He wrote this review for The Washington Post.

I DIDN'T EVEN SEE 'EM!"

tains, it moves us; it can shift from pain to bawdy humor and back again, effortlessly, as convincing in its tones and shifts as the voice of a worldly, cunning and soulful old blues singer. It enables us to know Ebenezer Le Page so well that he becomes a universal figure and his story becomes the story of our century and our response to his story puts us in touch with our collective past.

Lost Masterwork

The publishers of "The Book of Ebenezer Le Page" have announced it as, "A lost masterwork of English fiction," and this might well be true. Very little is known of its author, G.B. Edwards, a Guernscyman who died in England at the age of 80 in 1976. We know that he was very much a recluse; that he lectured at a workingman's college in Chelsea and became friendly with Frieda and D.H. Law-rence; and that "The Book of Ebenezer Le Page," his first and only novel, was discovered among his pa-pers after his death. He had spent most of his adult life working on the manuscript, apparently. The novel is "a remarkable achievement," as John Fowles claims in his introduction. Certainly, the discovery of Edwards

BRIDGE

SOUTH took advantage of a slight-agramed deal. West passed originally with a borderline hand and then made a take-out double on the next round. When North-South then continued to four spades, East believed that his diamond king would be a safe defen-sive trick and ventured a double. He was disillusioned when the opening diamond lead was won with the ace in dummy and South ruffed a diamond

NORTH ØK7 ¢ A8643 **₽**∆2 -WEST (D) VAQ962 ¢0395 ♣0954 SOUTH ♦Q8743 ⊽J53 0 10 **♣KJ86** Both sides were vulnerabl ling: West North Ezg Pass 3 ♦ 10 Pass 1♦Dbl, 44 Pass Pass Pass Dbi. Pass Pass Pass West led the diamond queen

Mier Vizion Cizge

777-57 552

ASHINGTON — Ten years ago this month, when he w a rubber snake at Jack Nieklaus on the first tee and beat him in a playoff at Merion to win his second U.S. an. Lee Trevino became famous.

ut now, as he returns to Philadelphia and another Mer-U.S. Open Thursday, many in golf, including Trevino -self, say he barely became known at all.

June, 1971, Trevino became bona fide - a second on is considered proof of golf bloodlines. That thunderof success brought Trevino into the glare of publicity.

is early sufferings were considered uplifting, amusing, thace. Anything at odds with that role was left in shadow. iomed superstar come to light, giving balance and hu-nity to what we knew and appreciated all along, is a melodramatic example, it's been a tour whisper for

rs that when Trevino began his comeback in '78 after and struck by lightning and undergoing back surgery for a tured disc, the second-leading money winner in golf hisy was almost broke. "I didn't want to make a comeback." says Trevino now.

had to make one. It got to a point where I was scared that rything I'd worked for would be gone.

Sure --- You Know

"I'd invested badly. I had almost everything tied up in "I'd invested badiy. I had almost everything uch up in [failed] project and, until I got out of it, it was draining "rything. I still had our \$300,000 home, but it had a 40,000 mortgage. I had eight [antique] cars, but that "still amount to too much. And I had one piece of comproperty all paid for that was worth maybe TCIAL 60.000

"Other than that, all I had was the rainbow." The rain-. N?

Sure — you know, the pot of gold that's buried under end of the rainbow. I've always believed in that. But 1 it to get my old tools out and dig for it again."

iny half-understood. Trevino needs to be read like some of : late works of Mark Twain - with trepidation, lest we d the joke is on ourselves.

People think Trevino's loosey-goosey," says Dale An-m, the PGA tour's public relations director. "In fact, he's that as a drum — so intense be has to talk and joke conntly to relieve the tension.

The reason be plays so fast is he has to. Trevino goes the players know it."

- says Trevino: "There ain't nothin' relaxed about me on a - if course. All that jabbering is a pressure valve. If the ayer.

Fans think Trevino is naturally gregarious. "Once he itgoing guys on the tour," says Antrum. "He never, and] ean never, eats outside his room.

Trevino, taking pleasure in being found out, says, "I never end any time with golfers away from the course. I don't ant to hear, 'At seven, I hit over the green, ...' After 6

"In a way, my personality is like [Muhammad] Ali's. In ont of a camera or a group, he's loud. But if you catch him one in a room, it's very difficult to hear a word he says." Even in the arcane technical debates of golf theory, Trevin is mysterious.

"People think Lee's got a bad swing," says Antrum. "The "with is he might have the best swing. He is the only guy out "ere who has every shot and will play 'em under pressure." "Yes, I think I have the best swing on the tour," Trevino

"Why have scores come down in the last 10 years? tys, artly because they're imitating me - open position, fade, its of power and control from the right side. In the evoluon of the game, who says they invented the swing right ack then? Maybe it's supposed to be flat like mine.

Within months, he had married a 17-year-old girl who was a ticket-taker at the local movie house.

At every turn, his golf dreams were stymied. For four years, he worked at a rinky-dink par-3 course on the theory that it was a back door to getting a PGA tour card. Then. after those four years, the range owner - the man Trevino considered a surrogate father - refused to sign papers validating his term of indentured servitude.

It took three more years, until he was 27, for Trevino to make the tour. Then, he played the rube, making fun of his own unorthodox swing, claiming it was all luck. But he won the 1968 Open. Says Trevino now: "When I came out here, my game was ready. From the first year, I did nothing but win tournaments and money."

And, from that first year, he has kept past and present separate in his mind. Travino has never forgotten several personal slights at his first Masters; he has never set foot inside the Augusta National clubhouse. "For me," said Trevino recently, "the first major tournament of the year will be the Open at Merion. I don't count the Masters,

His refusal to pity himself may be the hole card that Trevino has been forced to play more than any other. His ill-fortune everywhere but on a golf course has never ebanged. He's working on his third fortune - having lost two.

Maxim for Life

"Everything's OK now," says Trevino. But be and business seem to be a tragic mix. Three days before this year's Masters, the largest investor in their Titusville, Fla., golf course-and-condominium project died of a heart attack. A few days later, so did the project's general manager.

Suil, Titusville is working out, he says. "I've learned what to do and what not to do in business. The hard way."

He has always maintained that hard work would see him through - and that the loss of that insight would undo him. Trevino's grandfather, the gravedigger who could drink "from 9 in the morning until dark and still drive away" and who lived just long enough to see him win an Open, was a man of one maxim: " 'You want a life, you work for it.'

"A few years ago, I got to the point where I lorgot that," says Trevino. "I got it all too fast, Stardom, recognition, whatever. It went to my head. I was neglecting practice,

making excuses, turning into a give-up artist. "When I got hit by lightning [in 1975] and then bad the back surgery [in 1976], it gave me almost a whole year to take a good look at myself. I realized that for years I'd felt myself floating away from hard work. I was getting away from the one thing I believe in. Pride in what you do well is what makes a man.

At the age of 38, after falling to 33d place on the money list and battling a precarious back problem ("If somebody don't lift the bag out of the car for me, I don't play"), Trevino started to climb hack to the summit.

In the morning, he hung upside down on a trapeze apparatus, then exercised for an hour to limber his back. More of the same at night. And he followed the law he had laid down to young pros for years: "If the sun is up, why aren't you playing golf?

Last season, at 40, Trevino won three tournaments and \$385,814 - more than \$150,000 more than ever before. And, for the fifth time, he won the Vardon Trophy for lowest stroke average on tour.

He lacked only one thing - a centerpiece, a major cham-pionship to call attention to all that had happened to him since his last major, the 1974 PGA. "I know what you're talking about," says Trevino, "I could still do it. The No. 1

goal is still the same - to win the big one, the Open. "I may have spent a lot of time trying to find my game, but I haven't had to try to find myself," said Trevino during

his troubles a couple of years ago. "I've known who I was all along, if I forget, I look at my driver's license." "I'm not one of those freaky cats sayin', 'Hey, man, where you coming from?' and 'Where's it at?' I've always been 'at' the same place."

"Right bere," said Lee Buck Trevino, stomping his proud

The Soccer Scene

A Rule-Proving Exception

By Rob Hughes International Herald Tribune

LONDON - The last of the summer World Cup matches in Europe - Austria vs. Finland, Norway vs. Switzerland and Sweden vs. Portugal - offer more than anything else a belated chance for fortune they pick up now may the greedy to hone in on cheap talhave to last a lifetime.

Most goalscorers from the little countries have by now become acceleration to devastate England, mercenaries to Italian, Spanish or as in Basel, Switzerland, three West German paymasters. Indeed weeks ago, be has been arousing while clubs may have been robbed of their skills, agents and lawyers Italian interests for three years. Sulser, 26, saw his clubmate representing the players have be-Raimondo leave and join then-Eucome adept at insuring that if anyropean champion Nottingham Forest — and saw Raimondo one is exploited it is the paymaster. Curiously, bowever, this week's struggle for a first-team place, matches contain two proven interstruggle to retain any kind of grip national strikers who still operate on his international status. Yet it is not fear of failure that from their homelands. The reasons that Claudio Sulser plays for Zuset Sulser back. Nor is he uninrich and Hans Krankl for Rapid terested in playing for a foreign club. Says he: "I'd like to play lienna are virtually opposite.

Polerity

Krankl is a champion of the have-boots-will-travel breed. He sells his wares with the singlemindedness of a man who knows he is, at 27, well into the middle age of his high earning capacity. He will shoot left-footed goals for anyone. At the moment it happens to be Rapid Vienna, which bas taken over his huge per-match fee while Barcelona, which holds his registration, searches for a buyer. As usual, the Italian purse

hovers. Milan is paying John Cruyff, the Dutchman, \$100,000 to guest for it in another concocted tournament among former "Super Cup" winners. Milan, like many a club, would mortgage its stadium to sign Cruyff - and Levante of Spain almost did so. That little second di-vision club hired Cruyff's nomadic services for a couple of months and ended up with players picketing the offices because they had

not been paid. Milan, meanwhile, should it be unable to tempt Cruyff to stay, is watching Krankl, whose lawyers have never shown aversion to talking money in anyone's language. And in the same fake "Super Cup" tournament in Italy. Inter

Woodcock \$25,000, which could pre-empt a transfer from his German club, FC Cologne.

the chairman. Ducking off a plane bound for The Krankls, the Cruyfis, the Malaysia looks suspiciously like Woodcocks - utterly differing personalities and talents - bave professional players relieved of one thing in common: Their skill is managerial restraint (Manchester had sacked its manager) running in their boots and the fame and

off like spoiled truants. Yet there is no question that the clubs' greed is pushing players too Sulser is different. Sturdy, left-footed and with the far. One minute clubs, particularly in England, moan about being ferociously overburdened and the next minute they squeeze in trips across the world. There can be only one reason: cash.

good to anyone, so I got off the

plane and went bome and phoned

Page 17

And finally, for the record, here are some of the national champions - the big draws when it comes to arranging lucrative friendly matches:

Anderlecht (Belgium), Gremio (Brazil), Aston Villa (England), SL-Etienne (France), Bayern Mu-nich (West Germany), AZ67 Alkmaar (Holland), Juventus (Italy), Benfica (Portugal), Celtie (Scot-land), Real Sociedad de San Sebastian (Spain), Zurich (Switzerland), Trabzonspor (Turkey), Red Star Belgrade (Yugoslavia).

Major European honors went to Liverpool (Champions Cup), Dynamo Tbilisi (Cup Winners Cup) and lpswieb (UEFA Cup).

ITF.

This is a man, totally a creature of his past, who has forgotten nothing, forgiven little, learned from everything and always looked for a way to reconcile a good heart with Trevino never has known his father or wanted to. His mother was a maid and his maternal grandfather, who was

all the father he had, was a hard-drinking, itinerant gravedigger. Trevino grew up in a rural maintenance shack near Dallas with no electricity or plumbing. It wasn't degradation, but it was poverty.

A Messed-Up Kid

a smart percentage play.

Lee Trevino

"The best swing is the one that repeats. And that's what I have. Years ago, I had a 1-iron that I could hit 260 yards

The bare bones of Trevino's life have a chilling quality.

Like a magic lantern, they throw fascinating, sometimes frightening skeletal shadows. That he is as biting as he is facile, as philosophical as be is funny, should be no surprise.

through a doorway. Now, I can hit it through the keybole.

... Rubber friend had Nicklaus snake-bitten.

He dropped out of school in the eighth grade to earn money for the family. He took the elosest job at hand — doing maintenance at the golf course vards from home. A solitary child, he was given to hunting rabbits or fishing alone ("I was a messed-up kid. I'd fail in love with a fence post"). He joined the Marines.

The Corps taught him responsibility, pride, hard-drinking and carousing. In his first tour of duty, he mastered the machine gun, setting a speed and accuracy record that still stands. In his re-up tour, be mastered golf, turning a childhood hobby (he was a caddy) into a vocation. He left the marines in 1960 with one fixed idea: to become a pro golfer.

For years, Trevino denied his seriousness of purpose, telling tales about simply being a public course hustler who played all comers with a 26-ounce Dr. Pepper bottle. Now, he admits, "From '60 to '67, 1 did nothing but play golf 15 hours a day. You don't start playing at 5 a.m. every morning and hit a thousand practice balls a day for seven years just to win some \$2 bet."

But while he found order on the course, Trevino found chaos off it. His first marriage ended, he says, because of his immaturity and drinking. His wife and son moved to Obio. filan is paying Englishman Tony

moncy.

She would be eligible under the Olympic charter, if an Olympic tournament were being planned right now. Wimbledon champions would not.

On the pro circuit, where tennis who compete on the pro circuit getting into an Olympic tournahas become part sport and part show business, cynics have suggested there is no point in putting the sport back in the Otympics. Philippe Chatrier, president of the ITF, takes a different view.

"It is not fully appreciated how much this would mean to the grass roots of tennis around the world," said Chatrier. "In many countries governments will give tennis much

bigger financial grants if it be-comes an Olympic sport. There are still parts of the world where the Olympics are rated above everything else in sport. "And there's another thing.

Young players might stay out of the professional ranks a little long-er if they thought they could win Olympic modals. We think it

would be good for the game." Samaranch has said be favors pools of 32 players each in men's singles and women's singles. He does not want doubles because he wants to avoid adding too many competitors to Olympic village, already considered by many to be over-populated.

Garden's Clancy Resigns

the stadium.

only die once."

4

The Associated Press NEW YORK - Gil Clancy will resign his position as boxing matchmaker as Madison Square Garden July I to become a full-time television commentator, the Garden has announced.

Emerging Czech stars like ly tion is free to decide for itself who is a professional and should be barred from the Games. Lendi and Hana Mandlikova not even pretend to be amateu David Gray, secretary of the They hand over percentages their winnings but are allowed to ITF, said there is no question of keep some of it. players from Communist countries

not

The Russians are in a different league. They pulled their players out of the professional circuit in 1977, apparently because they foresaw Olympic tennis and want-I TANK AN ANTA ed to preserve their players' eligibility.

Such stars as Alex Metreveli and Olga Morozova, who used to hand over their prize money to the Soviet Tennis Federation, would be considered meligible for the Olympics. according to Gray's assessment.

Who Knows?

But nobody knows what bas been happening in Soviet tennis in

the last four years. Young players developing in the Soviet Union right now, unknown to the rest of the world, could be

come Olympic medalists in 1988. The charter says simply that to qualify for the Olympics a sport must be practiced on at least three continents and in 40 countries. A recent Unesco survey said 135 million people worldwide play tennis. Gray thinks the Unesco figures are on the high side.

Tennis was a regular Olympic sport from 1900 to 1934. It dropped out partly because of dis-

Wrigley to Sell Cubs to Tribune For **\$**20 Million

The Associated Press

CHICAGO - William Wrigley said Tuesday be will sell the Chicago Cub baseball team to the parent company of The Chicago Tribune for \$20.5 mil-lion. Wrigley owns 81 percent of the National League club's outstanding stock.

The sale is subject to the approval of the league and the team's board of directors and stockholders.

Stanton R. Cook, president and chief executive office of the Tribune Co., confirmed the transaction and said the purchase is expected to be accomplished promptly.

He noted that the Cobs and Tribune broadcasting proper-ties have been associated for many years. The first WGN radio broadcast of Cub baseball was in 1924 and WGN-TV began its television coverage in 1948, The Tribune Co. owns both.

Cold-Stove League's Ashes "On Friday," writes a man we know who likes his driver alike can argue with fine equality about a play-

baseball, "I would have gone home after work, had dinner and then settled down to watch the Yankees on TV. But since there was no game, I grabbed a sandwich at the deli and went to see 'Raiders of the Lost Ark.' Entertaining, but I went bome in a sour mood nevertheless.

Early Arrival

"On Saturday, when I might have watched part of the game before going to a party, I finished Gorky

Park' and still got to the party too early. "On Sunday, I got into an argument with a friend wbo's delighted with the strike. He thinks baseball is the most boring sport ever invented. Normally, I'm patient with baseball critics. If they can't appreciate its constant potential for the heroic, the sly and the impredictable, that's their loss. This time, I was surprised by my passion.

Way so short-tempered, I wondered? I think it's because I'm afraid of something. "Deep down, I know baseball is just as crass and

unruly as the real world, but 1 prefer the illusion -baseball as an amiable, ordered world contained within the neat geometry of a stadium. Colonel and cab . . .

.

er trade or a ninth-inning bunt. "The rules are known to all, and the unending vari-

... Olympic prototype.

ations are available to all for interpretation. "Strike or no strike, the need for the small change of conversation persists. Already I hear people talking in the corridors the way they do in the wintertime, in what the sports writers call the hot-stove league.

"The strike, says a Baltimore Oriole rooter, is a hidden blessing to the Yankees, giving its injured pitchers time to heal. Perhaps not, says a Yankee fan; it may be a curse, cooling off the intensity that produced 9 wins in their last 11 games.

Messily Mundane

understand that? What I'm airaid of is that illusions

"But soon the speculation will turn stale. The longer the strike lasts, the more games that are wiped out and the more statistics that are defiled, the more the illusion of shared order will be defiled as well. Then baseball will look just as messy as the world outside "What I wonder is: Do the owners and the players

THE NEW YORK TIMES.

Observer

Lisa Lyon: Lady in Weighting Flicking the Dial

By Russell Baker

NEW YORK - Saturday afternoon with the TV set: . and that's the scene here

at the 12th hole in Dubrovnik, where Watson bas just birdied his five iron to fall two runs behind Mario Andretti. Now we go to Lake Ladoga for the quarterfinal competition in water skiing where . . .

"Is that why you lied when 0 you told O'Toole you felt a giant 75. 000 turkey brush past you after the 1. lights went out for the scance?" 43 "You can't pin this rap on me,

shamus. Myra Baker Summers was

killed by a peck from a giant turkey. What's more .

. bases loaded and two out here in the seventh inning. Look at that little fellow sleeping, Wally." . . so don't wait another second. Rush right out and tell your hardware salesman Pete Petcock

sent you, and be'll give you a special . . . and lots more on Eyeball to Eyeball News at 6 o'clock with anchorman Ernie . .

"Do you see the same thing I see, Speedy?" "It's a mummy, all right, and it's

walking."

"... from my fresh yonthful skin that I am 57 years old, would you? The secret of eternally youthful skin is right here . . .

. . scoring two runs ahead of him! Look at his teammates pour out of the dugout to congratulate

"Speaking of dugouts, Wally, that plane they flew us out bere on yesterday smelled like a . . .

. . big heaping plate of fried chicken and a mountain of cole slaw that'll make the whole family lick their ebops and sbout for . . .

"... and you were lying when you told O'Toole that Mrs. Danvers had been secretly breeding giant turkeys."

* * *

"Just a minute, shamus. Have you seen this coroner's report? Myra Summers may have been pecked by a giant turkey, but the of her throat showed that she had inhaled lethal mummy dust. You know what that means?"

"Of course, somebody lied to OToole when they said there were no mummies in the room during the seance. Now we're

getting . . .' ".... crispy, crunchy, yummy, chunky goodies for gluttonous kiddies. Good for Fido, too, with twice as much tailwagging, meaty-tasting heartiness and oodles and oodles of . . ."

. . . international summer skijumping competition here in Marrakesh. Now we switch you to Munich for the semifinals in the Bavarian Cosmic Tennis Tournament for a purse of \$750,000. Bjorn Borg is seeded . .

... with this unique roach poison. See how Mr. Cockroach walks right in and then

"... turns into a giant turkey under the power of the full moon? But where does he get the mummy dust that he forces his victims to inhale?"

"I'll ask the questions, Hoskins. Why did you lie to O'Toole when you told him Mrs. Danvers hadn't imported any mummies from

lieve the painful symptoms of hemorrhoids, doc."

"Well, why don't you try . . . ". . . your New York Yankee baseball_cap. Offer good until . . .

. . we get this mummy off Jupiter and get him back to Earth where Doctor Kinsolving can subject the wrappings to ionic scan." "You mean we're gonna be locked into this spaceship with that mummy all the way back to Earth? I don't like it, Speedy. That thing looks . . . uncanny — like . . . like . . .

"... a grant from the Exton Corporation. This afternoon our guests will discuss the evolution of lute music. Did you know that in ancient China . .

"... they play this unique ver-sion of golf with pole-vaulting sticks, and we will bring it to you from Spokane next Saturday afternoon. Now, this word from Mario

Andretti Round up the usual

"Is that why you lied when you told O'Toole . . . ?"

Giving a Lift to Bodybuilding Feminine Style By Tony Komheiser

Washington Post Service

TASHINGTON - Lisa Lyon works out with weights 21/2 hours a day, six days a week, but when you meet her you see that the veins in her arms don't stick out like worms marching to Pretoria, and her pecs and her lats aren't the size of Utah. She was the first World Women's Bodybuilding champion, but she can't crack a walnut with her biceps and she doesn't use testosterone so she doesn't need a shave.

The eyelashes flutter and the voice is soft, and the words come out like so: "You're not condemned to develop some gross, caricatured body just because you work out with weights. . . . People who get to that massive bulky state have made a conscious decision to do it. It's not something that happens overnight - you have to work hard at it. I don't want to criticize them if that's their idea of beauty; beauty is a subjective evaluation. Bnt I don't want that. So it's a matter of stopping.

And then she strikes a pose. Not a competitive bodybuilding pose as much as a check-it-out kind of pose. No matter how you stack 105 pounds on a 5-foot-3 frame, it isn't going to bulge like a cheap canvas bag. "Jesus, look at me. People don't look at

my body and get intimidated."

Lyon was a graduate student at UCLA (after a bachelor's degree, cum laude, in anthropology) when she started lifting. She says she did it to "get a little more upper-body strength," but after a while she began to see she "was creating a new aesthetic and a new standard of beauty - a high-tech body." Bo-dybuilders work in front of mirrors, forging their fearful symmetry; they stare so much at themselves that their eyes ought to be eligible for Medicare. And the more she stared at it, the more she liked it, so she began going to Gold's Gym, the Versailles of the Beefcake Palaces, and pumping iron with a vengeance, seeking perfection.

Resented by Male Bodybuilders

"A lot of the men bodybuilders there resented being invaded by a woman. They thought I'd be in the way, and they thought I wasn't serious. Some, I'm sure, thought I was there to pick up guys, not weights. And some just wanted to watch me in a sexual way. . . . But after a while they realized that I was serious about bodybuilding, and they became very helpful, although I must admit that there was a significant amount of jealousy when the camera crews and the television stations started coming around to film me --that's why I've always been very careful to give them the respect they deserve."

Not that the acceptance came easily. There are still millions of women seeking that macrobiotic nirvana, trying to pour themselves

Lyon: "People don't get intimidated."

into Calvin Klein jeans, who would take one look at Lisa Lyon's lats and yelp in horror. Lyon's own mother, when she found out that ber daughter was training with Arnold (That Was No Beachball, That Was My Bicep) Schwarzenegger, suggested — only half-jok-ingly — that Lisa change her name to avoid embarrassing the family.

Posed in Nude

But now, at 27, after five years of training and a self-help book called "Lisa Lyon's Body Magic" in which Lyon occasionally poses nuce, giving the book a soft-core porn quality, Lyon is built like a jaguar, and mom is putting the copy of Playboy for which Lisa posed on the coffee table

"In the '50s you had women like Marilyo Monroe who were strictly sex objects," Lyon says. "In the '60s you had Twiggy, who started the undernourished, androgynous style. In the '70s there was Farrah. Now, in the '80s, health is a reality. Women are building up their bodies without sacrificing beauty or femininity. . . . Vogue this month is all about the active body. It's talking about optimum weight for health - not skinniness. I feel I represent a trend. And this isn't just some vain, vapid thing I've done. This isn't, Ladies, want to get in shape for the summer? - Give me a break."

Ask Lyon how she'd like to look and she says, "Like an animal, a sleek, feline animal." Ask her what the ultimate compliment to her look would be and she says, "If someone saw me and asked, "What planet did SHE come from? '

She is highly articulate, no question about that. And she has a good sense of humor, telling a radio interviewer, " ... just introduce me as one of the most talented and beautiful women on the planet, and it's an honor to sit across the table from me . . . A self-promoter of the first order, Lyon realizes that bodybuilding is not yet baseball (or even box lacrosse) in the U.S. national mindset, and that already a legion of women lifters, eating steroids and injecting testosterone, have bulked up so fast as to make her look-like a Before rather than an After. "I've made my contribution," Lyon says. "I start-ed this sport. It's not my fault other women want to take it farther."

Well, You Can't Stop It'

But she knows, as far as cashing in is concerned, it's now or never. She says "a pretty girl can sell anything," but if the trend in women's bodybuilding continues the next flight of champions will look like refugees from a Lon Chaney film festival. "You can't say it's not beauty." Lyon says.

Then, rearticulating, "Well, you can't stop

She was in Washington recently, accompanied by her husband of three months, Bernard Lavilliers, a French rock star, and to-gether the two of them looked like unimpeachable sources from the counterculture. For reasons known only to her (and perhaps a punk-rock group like The Dead Boys) she was wearing black mesh stockings, a black leather skirt, a thin, white Saran Wrap shirt, heavy eye shadow and three earrings in each ear. Let's say that you wouldn't have mistaken her for the star of "Little Miss Muffet Goes to the Convent." Maybe the best way to describe her look is to say that she could be a bouncer-bunny at a Playboy Club.

No More Muscle Magazine Photos

Speaking of Playboy, Lyon says she posed because "if I didn't do it, someone else would have, and they would have trashed her." She says she had full photo control of the layout. The fact is, I didn't need another picture in Muscle Magazine - the people who read Playboy are the ones that need to be educated to this concept of femininity."

Speaking of bouncing, Lyon says she hasn't yet been challenged to fight by some bozo on a barstool who knew she was a bo-dybuilder. "But some guys have asked me to arm wrestle. Could she .

'Deck somebody?"

Yeah.

"Probably. But I won't be put in that situation --- I just don't read Victim."

PEOPLE: Judge Orders Return Of 2 Dürers to Weimar

The announcement lifted a little of the secrecy surrounding what the bride of the year will wear when

she walks down the aisle of St.

Paul's Cathedral. The villagers of Lullingstone, in Dorset, south of

London, have been gathering tons

of mulberry leaves to fatten their

silkworms to produce the thread.

Lady Diana's gown will continue a

45-year-old tradition of using Lull-

ingstone silk at royal occasions. Queen Mary, Queen Elizabeth IPs grandmother, began it in 1936 by

having her coronation robes made

from it. The present queen chose it

* * *

Two 15th-century paintings by Albrecht Dürer that were stolen from a German castle occupied by U.S. troops in 1945 must be returned by a New York lawyer and art collector to an East German museum, a federal judge ruled. The lawyer, Edward L Elicofon, said he had bought the two 11-by-912-inch oil-on-wood portraits by the German Renaissance master in 1946 for \$450 from a "young American ex-serviceman" whose name he had since forgotten. An attorney for the East German museum, Kunstsammlungen zu Weimar, said the paintings were worth "millions of dollars." Judge Jacob Mishler of Federal District Court in Brooklyn, ruling in a suit that began in 1969, said that "the Kunstsammhungen, as a matter of law, has demonstrated that the Dürers were stolen and that it is entitled, as owner, to possession." Elicoton said he would appeal. Since 1969, when the legal skir-mishing began, the works have been held under court order in a New York City bank vault. Mishler's ruling did not say when the paintings had to be returned to Weimar. The two works were painted in 1499 and were color portraits of Hans Tucher and his wife, Felicitas, members of a prom-inent Nuremberg family. The portraits disappeared from the castle at Schwarzburg, near Weimar, shortly after the Nazi surrender in May, 1945. Until 1927 the portraits were part of the private art collection of the Grand Duke of Saxe-Weimar-Eisenach. In 1927 title to the grand duke's art collection passed to the government of the state of Thuringia. Until 1943 the paintings were on exhibition in the Staatliche Kunstsammlungen zu Weimar, the predecessor to the present museum. Officials of the

on July 2, 1945.

Lady Diana Spencer will wear a silk dress made from material pro-

duced by Britain's only silk farm for her July 29 wedding to Prince Charles, heir to the British throne,

for her wedding dress when she married Prince Philip Nov. 20, 1947, and for her coronation robes in 1953. Details of the processing of the Lullingstone silk thread weaving it into cloth, dying and the final assembly into Lady Diana's dress - are still a secret. The U.S. State Department concedes there "may well have been some lapses" in communicating with families of the Iran hostages during the long crisis, but re-jected complaints that it "didn't give a damn" about their welfare. Dorothen Morefield of San Diego, in a weekend interview with United Press International, accused the department of failing to provide information and support the families' needs during their 444-day ordeal. Mrs. Morefield is the wife of Richard Morefield, former U.S. consul general in Tehran. Morefield, who plans to continue his 25year career in the Foreign Service, described some of the problems as the result of "bureaucratic ineptness." Department spokesman Da-vid Passage said: "I don't really know what the precise facts are,

but I regret she holds the views that she does and that she has exmuseum, fearing that Weimar would be bombed, had the Dürer pressed. Everybody in this build-ing who was working on the hosportraits moved to the castle at Schwarzburg. In June, 1945, a U.S. tage crisis was working on it as hard as they could. At the time, Army regiment was stationed at the castle. Mishler cited an acthere may well have been some lanses." count by Dr. Walter Scheidig, then director of the Staatliche Kunst-* * * sammlungen, that the "disappear-ance of the Dürer portraits from He's the first American artist Schwarzburg Castle coincided in time with the departure of the ever given a major one-man show in China and, according to Oak-American troops from the castle"

land-born Dong Kingman, the exhibition of 103 of his paintings has been packing them in in Peking. "To my astonishment, about 5,000 people came the opening day," said Kingman, who has just re-turned from China, where his paintings are still on a tour that
